Church School will be held at 9:45 Sunday morning and the Youth Fellowship meeting at 6:30 Sunday evening.

High School News

Last Friday, January 17, several balls in various athletic sports were given away in a chapel program. Various groups of young boys and girls who had been the most attentive at the recreational programs were presented with basketballs, footballs, baseballs and bats.

The first young athlete to receive a ball was John Dobson, who is the leader of a group of young footballers of the fifth grade.

The second gift was a practically new basketball to a group of young basketballers: Murel Layton, Paullette Lane, Emmett and Malcolm Easton, Gary Martin, Donald Batton and Charlie Overman.

The third present was a new baseball to Roy Harrell, Wallace Goodwin, Haywood Rogerson, Jack Habit, Fred Keeter and Maurice Hassell.

The fourth present was a new basketball that went to a group of sixth grade girls who have been regulars at the play program: Sharon Lupton, Ruth Rae Elliott, Carolyn White, Joan Cobb, Harriett Conger, Mary Etta Perry and Sarah Wood.

The fifth present was a football that went to Frank Hughes, Tom Wright, Mickey Wright, Haywood Rogerson and others of this eighth grade team.

The last present was a new slugger bat, a hard to get item, to Al Habit for his perfect attendance record to practice for the sports football, basketball and baseball.

The purpose of the program was to present balls to these groups that are taking part in these various sports, with the suggestion that they use the balls together, letting the members of each group play with them.

Plan Locker Space Before Filling It

A lot of paper work is going to be needed before North Carolina's freezer locker plants will be able to handle all the food patrons want to store in them.

Dr. D. E. Brady of the N. C. Agricultural Experiment Station, in making this prediction, points out that many patrons do not even know the amount and kind of cuts they can get from a carcass of beef or pork. Some few have the mistaken idea that if they deliver a 400-pound beef carcass to the locker plant they ought to get about the same number of pounds of steaks and roasts.

However, he explains, a 218-pound side of beef will have only about 50 pounds of steak, 80 pounds of roast, 60 pounds of stewing, grinding and boiling beef, with the remaining 28 pounds lost due to trimming, bones and shrinkage.

Likewise, a 160-pound pork car-

CONSTIPATION Risky in BAD COLDS

Retained undigested food becomes putrefactive, causes toxins, which overload the liver and other vital organs of the body, lessening your resistance to colds and other winter ills and interfering with their treatment. Why take this chance when you can take Calotabs? Calotabs thoroughly yet pleasantly act on every foot of your intestines, sweeping out toxin-laden putrefactive foods and virus-laden mucus, enabling you to more effectively avoid or fight a cold. Nothing acts like good old Calotabs. Use as directed. 10c and 25c at all druggists.

Take CALOTABS

Your Contributions Restored Her Health

Your contributions of dollars and dimes last year made it possible for this young lady to recover from an attack of the dread infantile paralysis. She and her doll (at left) were admitted to the State Orthopedic Hospital at Gastonia several months ago. She is Mimi Eve Elliott, daughter of John W. Elliott, Route 2, Shelby. You can help many other such youngsters regain their health by contributing to the annual March of Dimes campaign which is now under way and continues through the month.

cass will yield about 80 pounds of curing meat, 30 pounds of chops and sausage and 25 pounds of rendered lard. The rest will be neck bones, spareribs, head, feet, waste and trimmings.

Once the locker patron realizes this fact, he should then figure out how many pounds of meat he will need for his family, Dr. Brady says.

A family of five may need, for example, 500 pounds of pork, 375 pounds of beef, 50 fryers and 100 pounds of fruits and vegetables. To put this 1,125 pounds of food through the locker would call for careful budgeting, since the average six cubic foot locker box will not hold more than about 150 pounds at one time, and could not, under any circumstances, take care of all this food.

Therefore, slaughtering would have to be properly distributed throughout the year so as to turn over the contents of each locker at least three or four times a year. Under such conditions, two boxes would suffice.

Burial Association Will Meet On February 3rd

W. M. Wilkins, secretary-treasurer of the Albemarle Mutual Burial Association, announced this week that the annual meeting will be held Monday, February 3, at 1 o'clock at Quinn's Furniture Store.

Mr. Wilkins has mailed to members of the association a statement of the financial affairs for the year ending December 31, 1946, which reflects a healthy condition of the association.

Sites have been selected for 63 of the 89 new hospitals that Veterans Administration is authorized to build in the world's largest hospital construction program.

Building And Loan Association Meets Tuesday, January 28

Rate of Interest Earned Slightly Higher Than Last Year

Every member of the Edenton Building & Loan Association has been notified that the annual meeting of the stockholders will be held in the Court House at 8 o'clock Tuesday night, January 28. Every stockholder is requested to attend the meeting, but for those who cannot attend, proxies have been provided to be properly executed and given to a stockholder who will be present so that enough stock is represented at the meeting to provide a quorum. According to Secretary R. E. Leary's report, the rate of interest earned during the year is .066806, which is slightly above last year, when the rate was .062267. Assets of the association are \$313,525.19.

National Meeting To Be In Raleigh

The Ninth Annual Veterinary Conference will be held at State College in Raleigh, January 28-31, 1947.

Dr. C. D. Grinnells, chairman of the program committee for the conference and veterinarian with the N. C. Agricultural Experiment Station, in making this announcement, reveals that a portion of the program has also been drawn up.

Heading the list of lecturers invited to address the group will be Dr. B. T. Simms, chief of the Bureau of Animal Industry of the U. S. D. A. and formerly connected with N. C. State College.

In addition to Dr. Simms, other speakers will include Dr. Frank Breed of Lincoln, Nebraska, whom Dr. Grinnells describes as a leading Midwestern authority on swine diseases. Dr. A. H. Groth, head of the Regional Animal Disease Laboratory at Auburn, Alabama, will also speak to the group, as will Dr. E. Lubby.
