

## Corn Yield Checks On 4-H Projects

**Average Yield on 25  
Projects 70.45 Bushels  
Per Acre**

Corn yields have been checked on 25 4-H Club corn projects, according to County Agent C. W. Overman. These projects are one acre each and Mr. Overman reports yields range from 36.59 to 107.45 bushels per acre. Three projects yielded over 100 bushels per acre, one between 90 and 100, two between 80 and 90, seven between 70 and 80, six between 60 and 70, three between 50 and 60, two between 40 and 50, and one between 30 and 40 bushels per acre. The average yield per acre on the 25 projects was 70.45 bushels.

Bennie Monds of the Center Hill community found that G-717 grown by his son Louis, a 4-H Club member, last year outyielded his corn over 12 bushels per acre with the same treatment. He was so well pleased that he planted a large portion of his crop to G-717 this year. Mr. Monds finds that his crop of G-717 is yielding approximately 105 bushels per acre this year and says it is the best corn crop that he has ever grown.

## Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

**CREOMULSION**  
For Coughs, Chest Colds, Bronchitis

community has a good open pollinated corn that he has been field selecting for several years. His son Wilbur, a 4-H Club member, used this variety in his corn project this year and made over 100 bushels per acre. In checking the yield on this project 233 good ears were found on 169 stalks, almost two good ears per stalk on the average. The soil is Norfolk sandy loam. He used 600 pounds of 4-8-8 fertilizer and 400 pounds of nitrate of soda.

E. L. Ward of the Edenton community reports a yield of approximately 115 bushels per acre on several acres of G-80. Mr. Overman says he still has to check yields on several other farmers' crops.

## September Saving Bond Sales Total \$32,112 In Chowan

**Chairman T. C. Byrum  
Urges Purchase as  
Best Investment**

T. C. Byrum, chairman of the Chowan County U. S. Savings Bonds Committee, announced this week that according to the monthly report just received from State Director Allison James in Greensboro, total Savings Bonds sales in September for Chowan County amounted to \$32,112.75. Of this total \$26,512.75 was in Series E Bonds and \$5,600 in Series G Bonds.

The total September State sales in North Carolina's 100 counties were as follows: Series E Bonds \$3,404,900; Series F Bonds \$255,022.75; Series G Bonds \$1,430,400; total E, F and G sales \$5,090,322.75.

In announcing the above figures, Mr. Byrum further stated that "there is now underway a campaign in North Carolina to promote savings through the sale of U. S. Savings Bonds, particularly aimed to reach our farmers who are in the process of marketing tobacco and other fall crops, as well as at business and professional men and women through the Bond-A-Month Plan, which is in operation at banks, and at industrial employees, through the Payroll Savings Plan which is available to them where they work."

Mr. Byrum continued "that thousands of North Carolinians have found U. S. Savings Bonds the safest, surest and most profitable way to put extra dollars aside for the future, which is thoroughly substantiated by

the very fact that they have thus far in 1947 invested \$65,664,495 in U. S. Savings Bonds, and that North Carolinians are now holding better than \$412,000,000 in Series E Bonds alone, and over \$800,000,000 in the combined Series E, F and G Savings Bonds."

## Another Very Deadly Enemy Of Cotton Is Called To Attention

**"Fire-packed" Bale Said  
To Cause Staggering  
Loss**

The boll weevil is a deadly enemy of the cotton industry, each year consuming millions of dollars worth of cotton, and is consequently the object of a mighty battle on the part of the farmers.

But another deadly enemy who gets only a fraction of the industry's attention compared with the weevil, is the "fire-packed" bale, according to John H. Todd, spokesman for the National Cotton Compress & Cotton Warehouse Association.

The "fire-packed" bale is one in which a spark or bit of fire is accidentally encased at the gin.

In the 1945-46 season, 90,894 bales of cotton were damaged by fire. At today's prices, that would be more than 14 million dollars worth of cotton. This staggering loss brought about a drive throughout the cotton belt to fight cotton fires and particular emphasis was placed on the "fire-packed" bale. Results of the drive were reflected in the fine record of the 1946-47 season, when in the first half of the season the number of cotton fires were reduced by 40% and the total number of bales involved in fires by 79%.

Records of the Cotton Warehouse Inspection Service show that for the most recent period studied (the first half of the 1946-47 season) 47% of all cotton fires were definitely caused by "fire-packed" bales. On top of this it is believed that the majority of the 39% of cotton fires attributed to "unknown causes" also resulted from fire-packed bales.

It is reasonably believed that approximately 87% of all cotton fires occurring during the first half of the 1946-47 season were attributable to "fire-packed" bales, Mr. Todd stated.

One fire-packed bale endangers thousands of other bales if not segregated, Mr. Todd emphasized. "If we are to remain the fine record of last season again this year," he added, "and save the industry many millions of dollars in fire losses, we must all pull together to stamp out the largely preventable 'fire-packed' bale."

## Aces Tuck Victory Under Belts At The Expense Greenville

**Outplay Pitt County Ag-  
gregation Friday  
Night**

Edenton High School's Aces on Friday night evened the count in games won and lost when they defeated Greenville High on the latter's field 7-6. The Aces outplayed Greenville far more than the score indicates, for two other touchdowns were made, but were called back by the referee. Edenton also registered 19 first downs while holding the Pitt County boys to four.

Early in the first quarter Wheeler passed to Goodwin, who scampered 47 yards to cross the goal line, but the play was called back due to a penalty for holding. Again in the second quarter the Aces drove 65 yards and with the ball on the two-yard line Jack Habit crashed through the center of the line, but the officials ruled that it lacked inches of being over. The half ended with the score

0-0.

At the start of the third quarter the Aces went on a rampage, carrying the ball over 50 yards to the two-yard line. At this point Russell Wheeler crashed through left tackle for a touchdown. Bobby Byrum also broke through the line for the extra point which resulted in the victory.

Greenville scored its touchdown near the end of the game. With the ball on the four-yard line in the only serious threat of the game, Perkins skirted right end on a double reverse to score. The try for extra point failed.

The Aces continued to play an improved brand of ball with Teddy Lupton, Al Habit, George Habit and Earl Goodwin showing strength in the line. Jack Habit, Bobby Byrum and Russell Wheeler carried the brunt of the offensive play, while Andrew Whitson thrilled the fans near the end of the game when he twisted, weaved and shook off tackles in a spectacular 25-yard jaunt.

## Red Men Witness North Carolina Film

Members of Chowan Tribe, No. 12, Improved Order of Red Men, together with a number of students and other visitors enjoyed a showing of the Esso moving picture, "North Carolina," Monday night in the high school auditorium. The projector was operated by Tex Lindsay.

The program was one of a series of entertainments planned by W. R. Israel in order to stimulate interest in Red Men attendance.

Next Monday night a short address on Redmanship will be made by Raleigh Hollowell. Special guests of
