

Symptoms Of TB Stressed By Local Health Department

One Person Undiscovered Endangers Entire Community

"One person with tuberculosis undiscovered endangers the entire community," says Dr. S. V. Lewis, Chowan County health officer. The local office, therefore, releases the following symptoms of tuberculosis, any one of which should make a person suspicious, and take steps to discover the reasons for the symptoms:

- 1—Loss of weight, loss of strength and loss of energy and endurance.
- 2—Feeling tired or "run-down", especially in the afternoon or evening.
- 3—Poor appetite, indigestion or dyspepsia.
- 4—A temperature normal or below normal in the morning and 99 degrees

or above in the afternoon or night.
 5—A persistent cough. Cough is frequently but not always present in tuberculosis. Every cough lasting three weeks or longer is suspicious.
 6—A hemorrhage of pure blood. Blood-streaked sputum is also suspicious.
 7—Pleurisy, a sharp pain in the chest made by deep breathing lasting an hour or more.

PALM SUNDAY SERVICES IN COLUMBIA AND EDENTON

In the Davenport Funeral Home, Columbia, the Most Holy Sacrifice of the Mass will be offered Palm Sunday, March 21, at 8:20 A. M., and in St. Ann's Catholic Church, Edenton, the Blessing and Distribution of Palm will start at 11 A. M., followed at once by mass, each mass including reading in English and Latin of St. Matthew's account of the passion of our Lord Jesus Christ, Holy Communion, followed at once by Sunday School, with confessions in Columbia 8 to 8:15 and in Edenton 10:30 to 10:55 A. M., stated Father F. J. McCourt, rector, who invites everybody to all services. Friday 8 P. M., Rosary, Stations of the Cross and Benediction.

Governor Cherry Is Honorary Chairman In Children's Drive

Effort Made to Save Thousands of Children's Lives

Governor R. Gregg Cherry of North Carolina has been appointed Honorary State Chairman for the American Overseas Aid-United Nations Appeal for Children campaign in this state, it is announced by Lee Marshall, national chairman of AOA-UNAC.

In making public his appointment of Governor Cherry, Mr. Marshall said it was particularly appropriate that the titular head of the state should be the leader of the Crusade for Children whereby the citizens of his state may express their individual concern for the welfare of millions of hungry children and other war victims in devastated nations.

In a letter to the North Carolina Governor, Mr. Marshall said: "There are twenty-six agencies banded together in this appeal which includes the private agencies with programs abroad and the International Children's Emergency Fund which is the operating agency of the United Nations. The goal of the campaign is \$60,000,000. We realize that this is only a small portion of what is actually needed to assist starving children abroad in any one year. War and its aftermath have resulted in unparalleled destitution in Europe and Asia. Through our joint effort we will be able to save thousands of children from dying of starvation."

"I am sure that your leadership will be of invaluable assistance in making the AOA-UNAC Campaign in North Carolina an overwhelming success."

Mrs. Frank Elliott Girl Scout Leader

In addition to Mrs. John W. Graham and Mrs. Meredith Jones, the Edenton Girl Scout troop now has Mrs. Frank Elliott as a new leader. The girls are delighted with the addition of Mrs. Elliott, who at the last meeting, talked to the members about music appreciation in connection with work on the second class badges.

RAISING SEED CORN

R. C. Holland and M. W. Jackson have ordered foundation seed and will each grow five acres of NC-27 seed corn this year. These growers served their apprenticeship last year.

Minutes of Board of Public Works

Edenton, N. C., Feb. 4, 1948. The Board of Public Works met this day in the Town office at eight o'clock P. M. in regular monthly session. Present, J. H. Conger, chairman, O. B. Perry and W. S. Griffin. On motion of W. S. Griffin, seconded by O. B. Perry, it is suggested that a letter be written Mr. Archie Lane or the manager of the Albemarle Electrification Cooperative affiliated

with the REA outlining that the Board of Public Utilities has been petitioned for lights in the St. John's area. In view of this petition and numerous others, from the same area, it is felt that the Board of Utilities is hereby notifying the above that unless they serve the section with electric power within 60 days, the Town of Edenton will run necessary lines and serve these people.

On motion by O. B. Perry, seconded by W. S. Griffin, bond from National Surety Corporation for roof on warehouse is accepted and delivered to R. E. Leary, Clerk. There being no further business, the Board adjourned. R. E. LEARY, Clerk.

FLOOR SANDING AND FINISHING

I do the work at a reasonable price. I also have sanding equipment and electric polishers for rent. I furnish everything, clean your old floors and wax and polish them with an up-to-date polisher, making them look like new.

Weekly Health Talk

By DR. GEORGE T. CRAWFORD
 CHIROPRACTIC PHYSICIAN

GERMS

(Continued From Last Week)
 Within the last three weeks several friends have asked me, "What about germ disease?" It is known to all scientists that the body normally manufactures its own antitoxins. We are so surrounded, covered and filled with germs of all types that if the body did not intelligently protect itself, none of us could possibly exist longer than a few days.

The body welcomes germs which are not only beneficial and absolutely necessary to our very life functions, but also those which are non-beneficial. The body knows and destroys its "enemy-germs." This ability is what is meant by NATURAL RESISTANCE TO DISEASE. It is maintained by many that germs are really scavengers and breed upon diseased tissues, their presence being more a result than a cause. Be that as it may, all Chiropractic doctors, and all medicine doctors for that matter, agree that "LOWERED RESISTANCE" is the PRIME cause of those diseases in the body which have been called "infectious." A properly nourished, properly functioning lung, for an example, whose nerve supply is not reduced or obstructed, does not yield to tuberculosis.

A common example: Why does one person develop a cold where ten others pass unharmed—why, even in the most cases of "epidemic" is only a fractional percentage of the public ill with the disease? Finally, why do virulent cases of smallpox, scarlet fever and other notorious diseases yield so quickly to Chiropractic methods?

In medicine today, quinine for malaria is ONE OF LESS THAN FIVE DRUGS, in the list of many thousands, that is recognized as an ABSOLUTE SPECIFIC. Organized medicine claims the same effectiveness for the antitoxins of diphtheria, smallpox, etc., but these are simply serums drawn from the BLOOD OF SICK ANIMALS and this foreign "juice" is induced into an already sick human. The medical theory being that the animal creates its own antitoxin to overcome a HUMAN DISEASE, which it was supposed to have, and that this "anti active something" is thus transferred to the human where it is supposed to accomplish the same benefit. How much better and in keeping with Nature when our bodies can be induced, by Chiropractic—natural methods, to make their own adequate resistance to every influence which may tear down the body and make it susceptible to disease. And this without the ill, and sometimes disastrous effects of "inoculations."

Now let me be exact and keep this talk FACTUAL, as the ideas discussed are not mine but are the result of genuine, scientific study of whole

nations and honest scientists.

"England, the cradle of vaccination, has repudiated compulsory vaccination 37 years ago. In 1941 England had not a single death from smallpox. Six died from the after effects of vaccination."

"The compilers of the ninth edition of Encyclopedia Britannica called upon Sir Charles Creighton, considered the greatest authority, to write an article explaining the advantages of vaccination. He made a thorough investigation and in reporting, stated that his faith in vaccination had been completely destroyed. The medical profession of Great Britain objected to the findings of their most eminent authority, called Dr. Crookshank of Kings College, London, feeling confident that he would disprove the findings of Dr. Creighton. After a most painstaking investigation he also condemned the practice."

"Australia has repudiated vaccination. In Australia and New Zealand less than 1% of the infants are now vaccinated and smallpox is practically extinct. Australia has reported only five deaths in ten years."

"Canada. In Canada the courts ruled that a soldier could not be court-martialed for refusing to be vaccinated. Case: Richard Wyne, Judge. O. M. Davidson, Toronto, Canada. This holds good for other inoculations, too."

"Holland has suspended its vaccination requirements because of serious illness following vaccination."

"United States. Only ten states have compulsory vaccination laws. Six have local option. The death rate from smallpox in the United States for each of the years 1940 to 1943 per 100,000 is given by the Bureau of Census as 00.0. It lists 14 fatalities in 1940, 12 in 1941, 8 in 1943. This number is so small as compared to the population that it is listed by the bureau as 0.0." (Citizens Medical Reference Bureau.)

Only Nature Heals—Never Drugs

Chiropractic doctors are not fighting the medical man, the Osteopath or Surgeon. Each has his certain field and none has a corner on health or the treatment thereof. The Chiropractor does resent and fights against the half-truths, distortion of facts and outright propaganda forced on the public by the Medical Trust. What we want is the truth and we want it presented in simple words all can read and understand. Also we want to hear it from ALL sides—then let the PUBLIC decide and choose. Remember, Health Freedom is as vital to Americanism as Religious Freedom. Be on the alert so that North Carolina keeps this "Health Freedom" which has been stolen from the people in several states already.

Today's biggest power bargain

Pay as you drive if you wish

It's a Complete New Buick Engine and We'll put it in Your Car at a Price You'll hardly Believe

YES sir, here's a big bargain for Buick owners—a brand-new straight-from-the-production-line Fireball engine. We'll put it in any Buick from 1937 models on up.

We'll take out your old mile-weary engine, put this one in, and make your car brand-new again as far as power is concerned.

Pep and snap come back—right up to 1948 standards. You get new-engine mileage from every gallon of gas. Oil consumption drops. And you enjoy the thrill of the liveliest, most responsive engine on the road today—the same engine that makes Buick the

snappiest car on the highways.

Think what this will mean to you—in comfort of driving—in new dependability—in sheer fun. Think of the extra worth of your car when it comes time to turn it in.

As to cost—it's so moderate it makes this change-over today's best power buy. Installation cost varies somewhat with car model. But we'll be glad to give you the figure down to the dollar if you'll drive around.

Don't put it off. Make up your mind to drive a 1948-powered car now. Come in and talk it over.

Quick Starts and Driving Zip

This 1948 ignition system with centrifugal and vacuum automatic control puts snap and go into starting and get-away.

Most for your Gas \$

An up-to-the-minute, efficient carburetor and air cleaner give new smooth power and most miles from every gallon of gas.

BUICK CARE KEEPS BUICKS BEST

A Delight to Handle

A "smoothie" if there ever was one! This new clutch with its easy, toe-touch response makes driving more fun than ever.
