

Mary Eloise Taylor Weds Linwood Ward

Ceremony Performed In Conway Church Saturday Evening

Miss Mary Eloise Taylor, daughter of Mrs. John Eldridge Taylor of Conway and the late Mr. Taylor, and Linwood Ezelle Ward, son of Mr. and Mrs. Ezelle Ward of Edenton, were united in marriage in a ceremony which took place in the Conway Methodist Church Saturday evening, July 9. The pastor of the church, the Rev. J. E. Garlington, officiated.

Wedding music was given by Mrs. Joe Fleetwood, violinist of Conway; Mrs. Kenneth Stokes of Severn, pianist; and Wilson Garriss of Murfreesboro, uncle of the bride, soloist.

The bride was given in marriage by her uncle, Frank Garriss of Conway. She wore a period gown of white embroidered satin, with marquisette yoke; embroidered bertha, and bouffant skirt of tiers of embroidered ruffles falling into a circular train. Her finger-tip veil of French illusion fell from an embroidered bonnet of satin and orange blossoms. Pinned underneath her bertha she wore a locket belonging to her maternal grandmother, with photographs of both grandparents. She carried a white prayer book covered with purple-throated white orchids and showered with baby orchids, lilies of the valley and stephanotis.

Mrs. Marion B. Melvin of Raleigh, sister of the bride, was the matron of honor. She wore a blue marquisette gown, with off-shoulder bertha and tiered ruffled skirt. Her half-bonnet and mitts were of matching material. She carried a crescent of yellow roses.

The bridesmaids were Mrs. Ennis Martin of Conway, Miss Nancy Casey of Mount Olive, Miss Myrtle Mitchell of Raleigh and Miss Rita Pons of Rutherford College. They wore identical dresses of peach-colored marquisette made like that of the matron of honor, and also carried crescents of flowers.

Little Miss Linda Garriss of Conway, cousin of the bride, was the flower girl. She wore blue marquisette like the matron of honor, and carried a basket of mixed flowers. William Leary of Edenton was the

best man and the ushers were West Byrum, Jr., Shelton Moore, Maurice Bunch, Jr., and Millard Ward all of Edenton.

The mother of the bride wore a gown of dusty rose lace, a small hat of moss green tulle, and a purple orchid corsage. The mother of the bridegroom wore a gown of lime lace and marquisette, with matching headdress, and an orchid corsage.

Miss Mabel Garriss, aunt of the bride, assisted by Mrs. Hendy W. Maddrey of Severn, was mistress of ceremonies.

Immediately following the ceremony, the mother of the bride entertained at a reception in her home. Later, Mr. and Mrs. Ward left for a wedding trip. Upon their return, they will be at home at Beechwood Farm near Edenton, where Mr. Ward is engaged in agriculture and stock farming.

For traveling, the bride wore an original model suit of beige silk shantung, with brown and beige hat, and matching accessories. The orchids from her prayer book were used as a corsage.

Mrs. Ward was graduated from Conway High School. She received her bachelor of music degree from Greensboro College in Greensboro after having given her senior recital in piano, violin and cello.

Mr. Ward was graduated from Edenton High School. He attended McCallie Military School in Chattanooga, Tenn., and was graduated from Embury-Riddle School of Aviation in Miami, Fla. He also attended State College in Raleigh.

Those who entertained for the bride-elect included: the Misses Nancy Casey and Rita Pons of Greensboro College; Mrs. C. J. Garriss, grandmother of the bride; Mrs. Marion B. Melvin of Raleigh, sister of the bride; Mrs. Russell Johnson of Conway; Mrs. H. Peter Stephenson of Severn; Mrs. Ennis Martin; and Miss Mabel Garriss and Mrs. Wilson Gar-

Sulfur Dusting On 4-H Club Peanuts

Variqus Demonstrations Being Made In Chowan County

Assistant County Agent Robert S. Marsh last week helped several 4-H Club boys sulfur dust their peanuts, with cooper sulfur used at the rate of 12 to 15 pounds per acre. In two weeks the next application will be made at the rate of 15 to 18 pounds per acre. Two weeks after that the third and final application will be made at the rate of 18 to 22 pounds per acre.

Sulfur dust helps to control the leafspot disease in peanuts. Since the sulfur gives a good control of the leafspot disease, the plants stay green longer in the fall, and consequently give a higher yield of peanuts.

Several farmers have often asked the question as to which is the best, copper sulfur dust or plain sulfur. The Experiment Station still recommends that copper sulfur be used, however an attempt is being made to find out by comparing the two in this county. Demonstrations of copper sulfur, plain sulfur and no sulfur are being conducted on four farms in the county. There are three acres for the demonstration work in each field and this demonstration should furnish some good information concerning the value of sulfur compared to copper sulfur dust.

HEALTH FOR ALL

SAFE SWIMMING

Most people regard swimming as the ideal sport. It is good exercise and is refreshing, and brings relief from summer heat.

So it is easy to forget that swimming can be hazardous. We may not realize the dangers of swimming until we hear of a drowning, or have the unpleasant experience of a "narrow escape" in the water ourselves.

By far the greater percentage of swimming fatalities are the result of carelessness. In almost all cases they could have been avoided if a few precautions had been observed.

This may seem unnecessary advice, but anyone who likes the water whether it be lakes, pools, rivers or the ocean, should learn how to swim. Knowing how to swim makes the water more fun, as well as less hazardous.

But even good and experienced swimmers should never go swimming alone. Accidents can happen to the best swimmers and someone else should be along—preferably a person who also swims well—to help out if anything should go wrong.

Most of us were warned as small children not to go into the water too soon after eating. Rushing into the water before the food has time to digest invites stomach cramps which usually make their victim helpless.

Moderation is important in swimming as it is in everything else. No one, not even an expert, should swim to the point of complete exhaustion, or stay in the water after he becomes chilled. Panic, resulting in helplessness, can overtake any swimmer who

becomes fatigued or chilled, although most swimmers know that when they become tired or cramped they should float on their backs until they become rested or until help comes.

It is foolish to swim in dirty water, or in unknown waters that might be polluted and unsafe for swimming. Remember that with your nose and mouth submerged in water that might be polluted, it is easy to take in germs that may cause serious illness.

If you enjoy diving, learn to dive properly and make certain the area of water in which you plunge is right for diving. It is wise, also, to check with your doctor if you intend to dive, since people with sinus or ear trouble can be seriously injured in diving.

In short, if you exercise common sense and avoid taking foolish chances, swimming can be an enjoyable, healthful summer pleasure, free from harrowing experiences and serious accidents.

Kidneys Must Work Well

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.
