JOHN DEERE for Tops in Tillers

Add up the features that assure long-lived tiller satisfaction and you'll find—a John Deere is "tops" in tillers.

Its superiority begins with proper design. The overhead frame places most of the weight above the disk gang for maximum penetration and clearance. Disks are heat-treated to increase their strength; bearings are heavy-duty type, self-aligning for lighter draft.

The convenient power lift raises the disk gangs high and clear. Hydraulic Power-Trol can also be used to make your work easier. Adjustments for leveling, changing the depth of cut, and angling the disk gang to meet varying field and soil conditions, are mighty easy to make.

No matter what the tiller job may be, you'll be completely pleased with the extra-quality . . . the broad adaptability . . . the economy of operation a John Deere offers you. See us soon for complete information.
