

Interest Is Lagging In Canning Tomato Program In County

Few Farmers At Meetings to Sign Contracts For Acreage

According to County Agent C. W. Overman, the cannery tomato program is progressing very slowly in Chowan County. Last week four meetings were scheduled for the purpose of explaining the contract offered by the G. L. Webster Company and farmers were given an opportunity to sign contracts if they so desired.

At the Edenton meeting five farmers attended the meetings scheduled for Rocky Hock, Chowan Community Building and Gliden. Mr. Mapp, representative of the G. L. Webster Company at the close of the work on Tuesday afternoon was quite disappointed in the sign-up. Mr. Mapp stated that the prices and other provisions of the contract are in line with other contracts of other canners this year, and in many instances is much better.

Mr. Overman states that his position in this venture is to help farmers avail themselves of an opportunity to utilize some of their land being taken out of allotted crops. He believes that where a reasonably good job of growing tomatoes is done the return per acre for the land and labor will be good compared with many of the crops now growing.

Mr. Overman sees the possibility of cannery tomatoes and other crops for canning becoming a part of the farming program in future years if farmers find it profitable. If farmers indicate sufficient interest and a reasonable acreage is contracted for by Saturday, January 21, it is possible that signing of contracts will be extended through January 28. On the other hand, if the progress this week does not speed up, it will be concluded that farmers in Chowan County are not interested enough to justify the project this year. Contracts are available at the County Agent's Office and farmers who are interested should come in and discuss the matter and sign contracts just as soon as possible if they are interested in seeing the project succeed.

Flyers Down ECTC And Campbell Frosh

The Edenton Marine Corps basketball team defeated the ECTC freshmen last week.

The Flyers won 70-43 from the Campbell College boys Thursday night and on Friday night won from the ECTC freshmen by a score of 48-38.

In the Thursday night game Anderson was high scorer with 13 points, followed by Stanky with 10. Sloan led Campbell with 8 points.

On Friday night Perkins was leading scorer with 13 points, while Blake led ECTC with 13 points.

DIME SOCIETY WILL HOLD MEETING JAN. 24

The Dime Society of the Edenton Baptist Church will meet Tuesday night, January 24, at 8 o'clock with Mrs. J. H. Holmes. All members are urged to attend.

YES'M — THEY COST A LITTLE MORE!

We've started, in a small way, a method of raising chickens which, we believe, is new to Edenton. That is, the "Battery" method—where they are grown on wire and in metal pens 20 inches by 30 inches. The chickens are completely clean—inside and outside—from day-old chicks to broilers and fryers.

Our oldest chickens will be 8 weeks old on Friday, January 20th, and will weigh from 2 to 2½ pounds, live weight. We've already found that this is a more expensive way than the "barn-yard" method but feel that you will agree with us that they are worth the difference. After all, ham costs more than shoulder, and sirloin steak more than stew beef, and for the same reason—it's better!

We are receiving 150 pure-strain New Hampshire Red chicks each week and will have approximately that number to sell weekly beginning this Friday. We will dress and deliver on Fridays only, but live chickens may be secured at any time, if available.

We'd be glad to have you visit and inspect our little enterprise just ½ mile down Paradise Road. We're rather proud of our start and hope that you'll help it grow.

If you prefer quality—won't you give our "TENDER-SWEET" broilers and fryers a trial?

45 cents per pound (live weight) plus 15 cents for dressing, if desired. Call 415-J or 268-W.

JOHN DEERE
QUALITY FARM EQUIPMENT

Wherever modern farming is practiced, you will find quality John Deere Equipment . . . and enthusiastic John Deere boosters.

These farmers, as their fathers before them, have found that the leaping deer trademark is the label of farming equipment correctly designed . . . properly built . . . to give them the maximum service, over the longest period of

time at the lowest possible cost.

With today's modern power equipment doing increasingly more of farming's muscle work, quality of farm equipment—both in design and construction—has assumed a new and even greater importance. That's why it pays to look for the John Deere trademark on the farm equipment you buy.
