United States Engineers have completed a \$32,500 approach channel and anchorage basin at Stumpy Point, N. C.

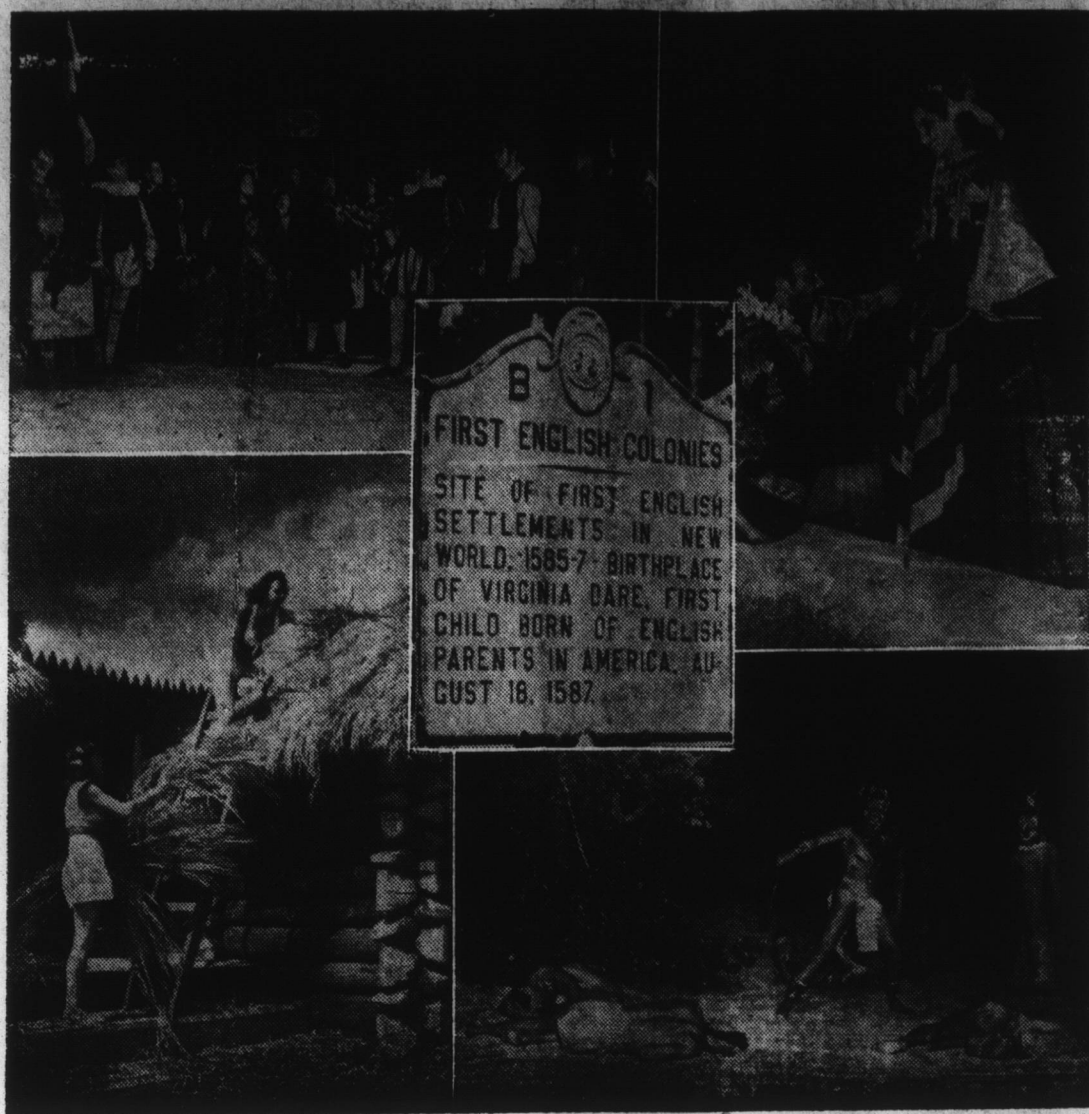

The new 8,000 feet long channel will result in savings of an estimated \$19,400 in annual transportation costs, according to Congressman Herbert C. Bonner.

It was of the numerous small river and harbor projects proposed by the North Carolina Congressman to serve commercial fishing interests and pleasure craft.

The recently completed channel is 75 feet wide and seven feet deep, extending from the seven foot depth in Pamlico Sound, through Stumpy Point Bay, to Lake Worth. The anchorage is 600 feet long, 50 feet wide and seven feet deep.

One of the major benefits to be realized from the project will be an estimated \$15 a ton savings on 750 tons of fish shipped from the area annually.

RISE UP AND FIGHT FOR FRANK GRAHAM

Ugly pictures are being carried around by a few to deceive you and hurt the people's Senator, Frank Graham.

Don't let this low underhand and sneaking campaign hide the fact that Frank Graham is for the farmers, laborers and all others who make up the masses of the people.

He cannot be bought by the bigcorporations and privileged few.

It's an insult on the people of this county to think that we are dumb enough to fall for the many untrue things being said about our great Senator and friend, Frank Graham.
