

Question—How can I control lice on cattle and in cattle sheds?

Answer: Dr. J. Clark Osborne of State College says the following mixture can be used for control of lice on cows from which no milk is being used for human consumption: 5 per cent DDT powder prepared by mixing one tea-cup of 50 per cent wettable powder with 10 tea-cups of flower of sulfur. Apply dust around head and neck, along back, and between legs. Repeat in two weeks. Cows producing milk for human use should NOT be treated with DDT. A 1 1/2 per cent strength of Rotenone may be applied as a dust to milking cows to control lice. The dust treatments are recommended for winter use.

Buildings or sheds that are infested with lice, says Dr. Osborne, may be treated by spraying DDT mixture upon all areas which are suspected of being infested. In warm weather a 2 1/2 per cent DDT spray is recommended for the control of lice.

Question—What is the poultry outlook for 1952?

Answer—Higher production costs and slightly lower prices appear to be in store for the poultry industry the coming year. For this reason, say State College specialists, it will be more important than ever that efficient production practices be used.

Egg prices are expected to be slightly to moderately lower during the first half of the year, but equal to or above those of 1951 during the last half. Broiler prices will average slightly to moderately lower for the first part of the year and perhaps the same as in 1951 for the last half of 1952. Turkey prices will average slightly lower. Poultry feeds probably will cost 10 to 15 per cent more this year, and labor costs will be higher.

GUM POND CLUB MEETS

The Gum Pond Home Demonstration Club met with Mrs. Ellie Bunch Tuesday evening, January 15th at 7:30 o'clock. The meeting was called to

order by singing "America." Mrs. Everett Wilson led the devotional, reading the 118th Psalm. The Club Collect was repeated and minutes of the previous meeting were read and approved.

Committees were appointed for 1952. Mrs. Herman Nixon was appointed Chairman of the March of Dimes Drive.

The club decided to have for their community project for 1952, Helping the Sick and Needy.

Mrs. Nelia Smith was reported on the sick list. The club decided to send her an apicanthia bush.

Miss Rebecca Colwell showed pictures of yards and urged the members

to improve their yards. The hostess served delicious ice cream, cakes, mints and nuts.

None can love freedom heartily but good men; the rest love not freedom but license.

—John Milton.

Crop And Seed Groups Plan Annual Meeting

The North Carolina Crop Improvement Association and the North Carolina Foundation Seed Producers, Inc., will hold their 1952 annual meetings at N. C. State College on January 25, beginning with registration at 9 A. M.

J. H. Hilton, dean of the State College School of Agriculture, will welcome the group. Richard T. Cotton,

leader, stored plant products section, Bureau of Entomology and Plant Quarantine, U. S. Department of Agriculture, Manhattan, Kansas, will speak on "Practical Methods of Keeping Stored Grain Insects Under Control, and New Developments."

George D. Jones, extension entomologist, will lead a discussion period following Cotton's talk. J. B. Cotner, grain marketing specialist, State Department of Agriculture, will speak on "Marketing North Carolina Grain Crops."

Speakers for the afternoon session will include O. W. Easley, Jr., agricultural engineer, Mississippi State College; R. W. McMillen, manager of the Foundation Seed Producers, Inc.; and R. W. Cummings, director of the North Carolina Experiment Station.

Easley will speak on "The How and Why of Correct Seed Processing. McMillen will report on new crop va-

rieties being increased for growers of certified seed, and Cummings will give a summary of the day's discussions.

The Crop Improvement Association will hold its annual business meeting at 3:15 P. M., and the Foundation Seed Producers will meet at 3:45 P. M. No seed exposition will be held in connection with this year's meeting.

J. R. Kiker of Polkton is president of the Foundation Seed Producers, and K. J. Shaw of Laurinburg is president of the Crop Improvement Association.

MONEY-SAVING TIPS FOR HOME BUILDERS

Too many times, homes built by private individuals run far beyond original estimates . . . to the anger and disappointment of owners. Before you build your dream house, learn 30 ways you can save on expensive "extras" in February 10th issue of

Announcing the Golden Anniversary—
Cadillac

...WITH THE FINEST PERFORMANCE OF ALL TIME!

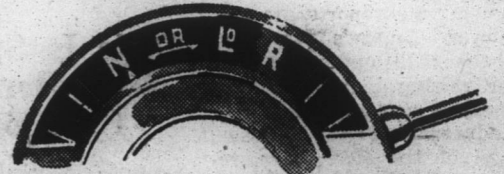

Featuring 3 of Cadillac's Greatest Engineering Achievements!

THE NEW 190 H. P. CADILLAC ENGINE

Here is the most powerful, the most durable, and the most efficient automotive engine ever offered in a Cadillac car. Its power increase alone is almost 20%—and its new four-throated carburetor, larger exhaust valves, wider exhaust ports and new dual exhaust system make this engine one of the most dynamic performers of all time.

Fifty years ago, the first Cadillac car made its bow to the public. Today, as a fitting climax to those fifty years of progress, we are presenting in our showrooms the Golden Anniversary Cadillac—by far the finest car ever to bear this distinguished name. . . . It is easily the most beautiful of all Cadillacs. Numerous changes have sharpened and smartened the exterior design—while the wholly-new interiors are a revelation in comfort and luxury. . . . Performance is the finest of all time. The great Cadillac engine has a power increase of almost twenty per cent—and is even smoother and quieter in its operation. . . . There's a new Hydra-Matic Drive that gives the proper power application for every need. At a flick of the finger, you can have extra power and acceleration for city traffic and mountain driving—or wonderfully smooth, quiet, gas-saving performance for the open road. . . . And there's a new "power steering" mechanism, optional at extra cost, which reduces normal steering effort by as much as seventy-five per cent! . . . If ever it could be said of a car's performance that it is "out of this world," it can be said of the performance of the new Cadillac. The Golden Anniversary Cadillac is available in three series—the "Sixty-Two," the "Sixty Special" and the "Seventy-Five." . . . These new creations are now on display in our showrooms—and we invite you to see and inspect them at your earliest convenience.

THE NEW HYDRA-MATIC DRIVE

By introducing an entirely new performance range, Cadillac's Hydra-Matic provides the proper power for every need . . . extra acceleration and responsiveness for city and mountain driving; smooth, quiet, gas-saving performance for the open road. Optional at extra cost on Series 75. Standard equipment on all other models.

THE NEW CADILLAC POWER STEERING

This "power steering" mechanism eliminates as much as seventy-five per cent of all normal steering effort. It provides incredible handling ease, and yet does not interfere in any way with the driver's "road feel" or directional control. Available as an option at extra cost.
