

Two 4-H Projects Renewed In State

Dress Revue and Bread Demonstration Creates Interest

Meetings were held in several communities of the county for 4-H Club members of that particular community Wednesday and Thursday of last week. These meetings were held at the homes of local leaders.

The Advance Club, which met with Jarvis Skinner, had 100 per cent attendance. None of the other clubs approached this good record of attendance. At the meetings projects were discussed, record books checked and then the boys were taken into a cotton field and given a method demonstration on how to make a boll weevil and a square count. The boys learned their lesson very well, and after the demonstration they found several squares which were punctured by boll weevils. Some of the squares were punctured and eggs were laid inside the squares. Others had feeding punctures. The club members soon learned to distinguish between egg punctures and feeding punctures. Each of the members is planning to make a square count at least once a week for several weeks and send in a report to the county agent's office.

Bible School Children Thanked For Books

Edward Davenport, chairman of the Rehabilitation Committee of the Pasquotank-Perquimans-Camden-Chowan Tuberculosis Association, wishes to thank the teachers and children attending Bible School at First Methodists and First Baptist Churches for the lovely box of Bible cut-out books that will be sent to the Children's Division at McCain Sanatorium.

He also wishes to express his appreciation for the magazines that have been sent to the Health Department for patients waiting for sanatorium care.

Cleanliness is, indeed, next to Godliness. —John Wesley.

IMMUNIZATION CLINICS OFF IN PASQUOTANK AND PERQUIMANS
Due entirely to lack of interest on the part of the people in the rural areas of Pasquotank and Perquimans Counties, the Health Department will not hold rural immunization clinics

GARDEN TIME
ROBERT SCHMITT
N.C. STATE COLLEGE

Raspberries and dewberries have just about finished bearing for this season in Eastern and Central North Carolina and now is the time to prune them. To understand why we prune them at this time we should know something about the growth and fruiting habits of these crops. Raspberries and dewberries bear most of their crop on new shoots that come out of canes of last season's wood. Each season after bearing a crop the last season canes will die and their place will be taken by new canes which come up from the roots of the plant. The old canes, therefore, should be removed as soon as the crop is harvested. This practice will give more room for the new canes to develop as well as to get rid of diseased plant materials.

In Eastern North Carolina a slight this summer, it has been announced by Dr. B. B. McGuire, health officer.

All persons needing or desiring such service may contact their private physician. Those people unable to pay their private physician for such service may have the work done free, according to State law, at their county health offices.

Recent experience has shown that so few people have been attending these rural clinics in Pasquotank and Perquimans as to make it not feasible to continue them.

Legal Notices

North Carolina, In The Chowan County, Superior Court. Before the Clerk Sadie B. Manley, Petitioner,

vs. H. L. Manley, Defendant.

NOTICE OF SUMMONS BY PUBLICATION

The defendant, H. L. Manley, will take notice that a special proceeding entitled as above has been commenced before the Clerk of Superior Court of Chowan County, N. C., for the purpose of obtaining an order for sale for partition of certain real estate in Chowan County, N. C., described in the petition which has been filed in this cause, and that said defendant is required to appear and answer or demur to the petition before said Clerk at his office in Edenton, North Carolina, on or before the 5th day of August,

ly different procedure is used for dewberries. As soon as the crop is harvested all canes, both old and young, are removed at the ground. Then the land is cultivated and a top dressing of nitrate of soda is applied. In a few days the new shoots will appear and will make sufficient growth during the rest of the season to produce a good crop the next year. This new growth and is not tied up to stakes until next is allowed to run along the ground spring. This practice gives a fair control of anthracnose disease of dewberries. The plant growth that is cut off at the ground should be destroyed by burning in order to get rid of all disease. In the mountain areas the season is not always long enough to permit the removal of the new canes. In that case only the old canes are removed.

1953, or the petitioner will apply for and be entitled to the relief demanded in said petition.

Witness my hand this 20th day of June, 1953.

LENA M. LEARY,
Assistant Clerk Superior Court.
June 25 July 2, 9, 16, 23

North Carolina, Chowan County.
