

## Kay White Bride Of Emmett Earl Eason

### Wedding Solemnized In Winfall Church Sunday, July 19

The marriage of Miss Kay White Stanton of Winfall and Emmett Earl Eason of Edenton took place Sunday afternoon at 5 o'clock in the Epworth Methodist Church in Winfall. The Rev. H. M. Jamieson performed the double ring ceremony. The church was beautifully decorated with fern, palms, cathedral candles, and a basket of white gladioli and carnations. Mrs. R. M. Riddick played the wedding music and accompanied Miss Shirley Winslow of Edenton, who sang "Indian Love Call", "At Dawning", and "The Lord's Prayer".

The bride is the daughter of Mr. and Mrs. Willis Jesse Stanton of Winfall and the bridegroom is the son of Mrs. Wilson Porter of Edenton and the late John Eason.

The bride entered on the arm of her father by whom she was given in marriage. She wore a gown of white lace and tulle, styled with a shoulder wide sheer yoke, basque bodice buttoned up the back with self-covered buttons, and a waltz-length bouffant skirt accented with panels of lace, forming a sweeping train. Her finger-tip veil of illusion fell from a pearl tiara. She carried a cascade bouquet of white flowers centered by a purple-throated orchid.

Miss Lucille White of Winfall, aunt of the bride, was the maid of honor. She wore a ballerina length gown of white organdy over green taffeta, fashioned with a V neckline, basque applied bodice forming abbreviated sleeves, and a bouffant skirt accented with applique and ruffles of organdy. Her headress was of miniature pom-poms. She carried a Colonial nosegay of orchid asters tied with green satin streamers.

The bridesmaids were Miss Evelyn Anne Stanton, cousin of the bride, Miss Jill Miller, and Miss Nonie Lou Lane and Miss Ann Myers, Miss Marjorie Winslow, and Miss Billie Skinner. Their waltz-length gowns were of embroidered organdy, fashioned with bouffant skirt, fitted bodice, scalloped neckline and tiny puffed sleeves. Their headresses were of miniature pom-poms. Miss Stanton and Miss Miller wore pink gowns and carried Colonial nosegays of blue asters, Miss Lane and Miss Myers wore yellow and carried nosegays of orchid asters, and Miss Winslow and Miss Skinner wore blue and carried nosegays of pink and white asters.

Gail Willey of Portsmouth, cousin of the bride, was the flower girl. She

wore a floor length gown of white net over taffeta, styled with an oval neckline finished with a net bertha and a bouffant skirt accented with a net ruffle. She carried a white basket of flower petals.

Quentin Earl Goodwin of Newport News, nephew of the bridegroom, was the ring bearer. William Goodwin, brother-in-law of the bridegroom, was best man. The ushers were Billy Eason, brother of the bridegroom, Stanton Harrell, Charles Davenport and Jinx Hassell, all of Edenton. Mrs. Tom Perry was mistress of ceremonies.

The mother of the bride wore a two-piece dress of copenhagen blue linen and lace with white accessories. Her corsage was of white carnations.

The bridegroom's mother wore a dress of pale pink lace with harmonizing accessories and a white carnation corsage.

The grandmother of the bride, Mrs. J. W. Stanton, Sr., wore a pink dress with white accessories and a corsage of white carnations. The bridegroom's grandmother, Mrs. N. J. Smith, wore a dress of beige lace with brown accessories and a carnation corsage.

Following the wedding, the parents of the bride entertained at a reception in the Winfall Community House. Mrs. Johnny Lane registered the guests, Mrs. Raymond Stanton and Mrs. A. R. Winslow presided over the punch bowls and Mrs. T. H. White served the wedding cake. A color scheme of green and white was carried out in the decorations and refreshments.

After the reception, the couple left for a short wedding trip to unannounced points. For traveling the bride wore a navy blue Sacony suit with white linen accessories and the orchid lifted from her bridal bouquet.

The bride is a graduate of Perquimans High School. The bridegroom graduated from Edenton High School and attended Wake Forest College. Mr. and Mrs. Eason will make their home in Newport News where Mr. Eason is employed.

### Joel N. Twine Dies After Long Illness

Joel N. Twine, 84, retired farmer of Perquimans County, died Friday afternoon at the home of his daughter, Mrs. W. S. Perry, of Edenton, after a long illness.

He is survived by one daughter, Mrs. W. S. Perry, four grandchildren, and six great-grandchildren.

Funeral services were held Sunday afternoon at 3 P. M., at the Edenton Baptist Church, of which he was a member, by the Rev. R. N. Carroll, pastor of the church. Burial was in Beaver Hill Cemetery.

Active pallbearers were Percy Satterfield, Glenn Perry, David Holton, Lonnie Bunch, Will Parker, and F. V. White. Honorary pallbearers were Gus Hughes, J. F. White, Sr., Tom Wilder, Brady Hare, Oscar Elliott, J. M. Vail, M. L. Bunch, O. C. Davis, W. J. Berryman and D. R. Baker.

### Research Results In Improved Cottons

Cotton produced in the United States today is strikingly superior to that grown only a decade ago in two important qualities, fiber length and fiber strength. A recent survey by the U. S. Department of Agriculture reveals this gain in cotton fiber length

and strength.

The improved fibers make stronger, more easily processed yarns and fabrics.

The study compares commercial cottons most widely grown in 1939-41 with those of 1949-51. It reveals that new cotton varieties with increased fiber length and fiber strength are being grown across the Cotton Belt.

The average length of fibers of nearly 12 million bales produced in 1939-41 was .98 inch. Ten years later the average fiber strength of nearly 14 million bales was 1.04 inches.

The average index of fiber strength came up from 6.78 in 1939-41 to 7.23 in the 1949-51 period.

Plant scientists see the ten-year gains as only the beginning of cotton fiber improvements which can be achieved through research.

### Needle Blights On Pine Trees Cureable

"If you have a pine tree afflicted with a fungus needle blight, there is no need to cut it down because it's not likely to die—and you may be able to cure it," says C. W. Overman, Chowan County farm agent.

Needle blights of Southern hard pines and the Eastern white pine are commonly caused by several fungi. Needles of the blighted pines die back from their tips for varying distances, but the bases often remain green, giving the needle bundles the appearance of having been partially dipped in brown paint.

Early stages of fungus blight can be recognized by spots or bands of discolored tissue in the green healthy parts of the needles. If needles have completely died back fungus blight can often be recognized by holding the leaves to the light to show up translucent resin spots and bands caused by the infection.

Fungus blights can be controlled, according to Mr. Overman, by spraying with Bordeaux mixture at the strength recommended by the manufacturer, or the organic fungicides Ferbam or Ziram at rates of 2 pounds per 100 gallons of water. Sprays should be repeated every few weeks

from May until September.

White pine blight, the cause of which is not known, should not be confused with fungus blights, says Mr. Overman. This disease is confined to eastern white pine, as the name suggests, and since its cause is unknown no specific controls can be suggested. Fungicidal sprays have proved to be ineffective in combatting it. Affected trees turn a reddish-brown color in mid-summer because of partial dying back of new needles, and trees that have had the disease for several years may have dwarfed needles, yellowish-green in color. Early needle shedding and reduction in shoot growth are also characteristic. Fertilizing and watering will do no harm and may help trees to recover from white pine blight, Overman suggests.

Every human being has a work to carry on within, duties to perform abroad, influences to exert, which are peculiarly his, and which no science but his own can teach. —William Ellery Channing
