

Valuable Information Received At Farmers' Schools Last Week

Attendance Was Not as Good as It Should Have Been

Farmers' schools, held at the Court House in Edenton last week, brought to much valuable information based on the latest developments at agricultural experiment stations. Even though weather conditions were quite rough it is felt that the farm attendance was considerably lower than it should have been. Approximately 100 farmers attended the seven half-day schools. Some of these attended two or more sessions, therefore it is estimated that approximately 80 different farmers attended one or more of the schools. Also in attendance were 18 others who were interested in the subjects being discussed.

On Tuesday morning Specialist Bill Westmoreland conducted an illustrated discussion on chemical weed control.

Dr. E. R. Collins discussed the latest information on fertilizers. He also discussed the use of anhydrous ammonia and liquid nitrogen as a cheaper source of nitrogen material.

In the Tuesday afternoon session Specialist E. S. Coates discussed grain storage and drying. He showed pictures of grain cribs which have proven successful at the experiment station. Several detailed plans are available to farmers for constructing such corn cribs and the cost will run very little higher than the ordinary barn constructed.

Frank J. Bell discussed new varieties and the recommended varieties of corn, soybeans, and small grain adapted to this area. Astor Perry spoke on ways of producing high peanut yields explaining that the two peanut varieties, N. C. 1 and N. C. 2 are proving very successful.

Specialist Sam Dodson spoke on pastures and the necessity of good pastures in better and cheaper livestock production. Chowan County is producing approximately 17,000 head of market size hogs annually. Hogs grown out on good ladino clover pasture will make gains at a feed cost of approximately 11 to 12 cents per pound while dry lot feeding will cost 16 to 18 cents per pound gain.

To provide sufficient good pasture for the hog population in Chowan County at least 1,500 more acres of good ladino clover pasture is needed.

The Wednesday morning session was devoted to a tobacco growers' school. Specialist H. G. Scott discussed insect control and many insecticides that are proven for use. J. C. Wells covered disease control in tobacco, particularly emphasizing soil fumigation to control nematodes. S. N. Hawks discussed tobacco varieties, fertilization, cultivation and curing.

On Wednesday afternoon Dr. Doris Brown gave some most important points in ways to increase the farm income particularly on small farms and pointed out that there is much that can be done on every farm in the way of following good practices to improve yields and quality of crops and livestock.

Specialists John L. Grey and W. T. Ellison brought a wonderful discussion on the farm woodlands on Thursday morning. They pointed out that the average acre of farm woodland in Chowan County can easily be made to produce four times as much income as it is doing at the present time. To do this will require some work, good care and management, and forest fire

WAGON BOX FIGHT—This print from the "U.S. Army in Action" painting series commemorates the heroic stand of 30 men from the Ninth Infantry Aug. 2, 1867, near Fort Phil Kearney, Wyo. They held off 2,000 Sioux Indians from behind a barricade of wagon boxes.

control. They highly complimented the people of Chowan County on the fine record they have had in preventing forest fires during the last two years, even though these years have been extremely dry.

Poultry was the subject on Thursday afternoon. Specialist W. G. Andrews discussed turkey production and the control of turkey diseases. Tom Morris spoke on raising good pullets and making a laying flock pay the highest returns. These discussions were supplemented by projected colored slides showing just what the speaker was talking about.

On Friday morning Specialist W. A. Stephen brought a most interesting and informative discussion on bees. He pointed out that there are a great many field crops and fruit crops that are dependent upon insects for cross pollination.

Senior Hi-Light

BY JANE YOUNT

The seniors have had a very busy week. Our calling cards have arrived and we hope to distribute them the latter part of the week. We also are measuring for our caps and gowns and most thrilling of all, we have received letters and pamphlets regarding our Washington trip. This trip is scheduled for the latter part of April or the early part of May.

For our Senior Girl this week, we have chosen Miss Jean Frances Spruill, daughter of Mr. and Mrs. Willie Spruill, Jr., of 301 East Queen Street. Jean was born December 1, 1935 and is a very popular member of the Senior Class. Her interests are mainly popular music, reading, movies and most special is Terry. Jean has been in the F.H.A. Club three years, and is a member of the Annual Staff. This busy girl also works in her father's drug store after school and week-ends. Her future plans are undecided but we feel whatever she decides to do, she will succeed.

And for our Senior boy, we have chosen Carroll Wood Jones. Carroll was born October 16, 1935, in Aoshkie and is the son of Mr. and Mrs. Frank Jones, now of Route 3, Edenton. Carroll was between the tender ages of eleven and twelve when he moved to Edenton, but his friendly smile and popularity was great, even then. Carroll's main interests are sports, as he is on the baseball and basketball teams. He is vice-president of the Monogram Club, and is a member of the Beta Club, Annual Staff and Spotlight Staff. Carroll's future plans are also undecided but we know that Carroll has the ability to make a success in whatever he undertakes.

By skillful conduct and artificial means a person may make a sort of name for himself; but if the inner jewel be wanting, all is vanity, and will not last. —Goethe.

Fine-car Styling An outstanding example of fine-car beauty in the low-price field . . . the new Crestline Ford is the fashion car for the American Road.

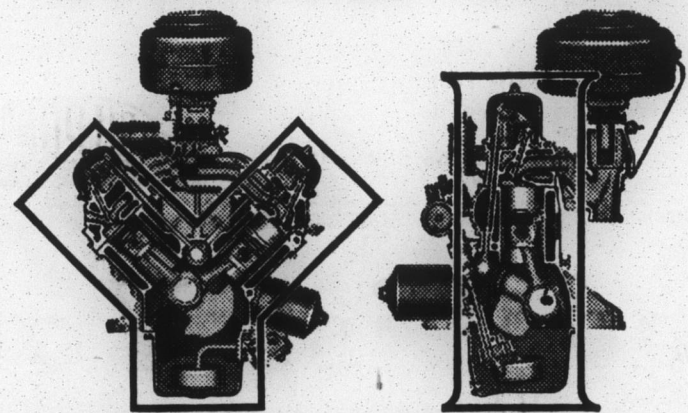

New Astra-Dial Instrument Panel is a safety dividend with speedometer placed high on the panel for easier reading. Warning lights tell when generator is discharging or oil pressure falls too low.

Style-Setting Interiors in Ford give you beauty from the inside out! Colorful new upholstery fabrics and smart trim are another '54 Ford dividend . . . help make Ford the style leader of the industry.

Extra Dividends at no extra cost!

The new Y-block V-8 with the new extra-deep crankcase and free-turning overhead valves, has 130-h.p. for a dividend of 18% more power. And you can enjoy V-8 advantages on less gas!

The new I-block Six has 118-h.p. for a dividend of 14% more power. Like the V-8, it has Ford's High-Turbulence Combustion Chambers for more complete and economical combustion of fuel.

The '54 Ford gives you extra Dividends in style, in performance, in ride, with fine-car features you would normally expect to find only in highest-priced cars.

New Ball-Joint Front Suspension

Simple, sealed ball joints replace king-pin system used on most cars. This revolutionary new system eliminates 12 wear-points . . . helps keep wheels in line for consistently easy handling . . . makes riding smoother.
