NORTH CAROLINA UNLIMITED

MORE Milk From FEWER Cows!

In October, 1953, North Carolina milk production set a new record of 141 million pounds for that month—AND, it was done with FEWER cows (386,000) than we had in June, 1944 (389,000), the all-time record-high number of head! The improved breeding and management of these dairy herds contributes greatly in making North Carolina a better place in which to work, play and live.

Another contribution to more pleasant living for North Carolinians is the brewing industry's self-regulation program where brewers, wholesalers and retailers—in counties where malt beverages are permitted under State control—cooperate to maintain wholesome conditions for the legal sale of beer and ale.
