

Large Number Of Vets In Training

New Applications Come In at Rate of 35,000 Per Month

One out of every six post-Korea veterans in America today has trained at some time or other under the 18-month-old Korea GI Bill, a Veterans Administration survey disclosed.

The 377,000 Korea GI Bill trainees enrolled for courses ranging from accelerated grade school work to post-graduate college study.

More than half of the trainees, or nearly 192,000, attended colleges and universities.

Another 30 per cent, or about 117,000 enrolled in schools below the college level. Trade and vocational courses were the most popular types of below-college schooling, accounting for nearly 69,000 veterans. More than 23,000 enrolled in grade schools and high schools; 19,000 selected business schools, and 5,700 took their training in correspondence schools.

Veterans who trained on-the-job under the Korea GI Bill numbered nearly 56,000. Nearly two-thirds of these were in apprenticeship programs. The rest were taking other forms of job training.

Approximately 13,000 veterans were enrolled in institutional on-farm training programs—a combination of classroom study with actual experience on the farm.

New applications for training from post-Korea veterans are coming into VA Regional Offices at the rate of 35,000 a month, VA said.

The nation's population of veterans with service since the outbreak of Korean fighting now stands at nearly 2,500,000.

Weekly Devotional Column

By JAMES MACKENZIE

Vance Havner tells us that he has found a deep understanding of the Bible, and a clear perception of spiritual things, among humble folk, untaught in schools, which cultured scholars utterly miss. For the Bible is not like other books; it is best understood by the heart, not the head. The Holy Spirit is the Author of the Bible, and He is the best interpreter of His own Book. "Eye hath not seen, nor ear heard, neither have entered into the heart of man the things which God hath prepared for them that love Him. But God hath revealed them unto us by His Spirit" (1 Corinthians 2:9-10).

The Bible is God's final and complete Word to men. It contains all that is necessary for us to know about Him. It is a terrible sin to deny that any part of the Bible is the Word of God. It is an even worse sin to add to the Bible the vain traditions and foolish opinions of fallible, finite, sinful men. The Christian's rule of faith and practice is "The Bible, the whole Bible, and nothing but the Bible." No Christian minister is worthy of his calling unless he can honestly say, with Alexander Campbell, "Where the Bible speaks, I speak. Where the Bible is silent, I am silent."

The best rule for understanding the Bible I know of was written by an English scholar some three hundred

years ago:
It shall greatly help thee to understand Scripture,
If thou mark
Not only what is spoken or written,
But of whom,
And to whom,
With what words,
At what time,
Where,
With what circumstances,
Considering what goeth before
And what followeth.

Bee Specialist Visits Chowan Beekeepers

Accompanied by Specialist W. A. Stephen, ten beekeepers were visited on Wednesday of last week. Bees are collecting much pollen and some colonies to store honey. Colonies generally were in good condition but many of them were ready for attention.

It is very important that beekeepers check each colony to see that it has a queen. Most of the colonies checked had six to eight frames of young brood which indicates the presence of a good queen and proper activity.

There are about 29 backyard beekeepers in Chowan County. It is very interesting as a hobby. A good honey supply is produced for home use and often some for sale or to give friends.

Bees are wonderful pollinators and help increase yields of our crops, particularly vegetables.

Easter Bunnies Make Gay Party Favors

If you are planning a children's Easter party, here are two bright ideas for decorations or favors.

Little bunnies made of absorbent cotton are appropriate for either individual favors or grouped in a table centerpiece. Each little bunny is made of two wads of absorbent cotton taped together. The upper wad is smaller for the rabbit's head, and the lower wad larger for his body. Use pink crepe paper to make a collar and long ears fastened on with cellophane tape. Attach three little dots on the face for eyes and nose.

A different kind of bunny can be made with an egg. Attach a fluffy tail of absorbent cotton with transparent tape, made into a little circle with the sticky side out. Shape ears of stiff paper—any color—and attach with clear tape. Paint in the eyes, nose, and whiskers. Set the egg into a nest of Easter grass sprinkled with tiny flowers, and the result is a pert little "cotton tail."

June Allyson is the inspiration for a wonderful love-story in Universal-International's Technicolor production of "The Glenn Miller Story," at Taylor Theatre, four days beginning March 28, in which she is co-starred with James Stewart. Feature roles are played by Charles Drake, George Tobias and Henry Morgan.

Question: Is the legume Birdsfoot Trefoil recommended for planting in North Carolina?

Answer: No. And if you try it do so only on a small scale. Quite often stands of this legume look good for a short time, then in a very few days can be almost wiped out by a disease which is common to North Carolina—rhizoconia. Research is still being conducted in the sandier areas and the bluegrass pastures in the Upper Piedmont. Your chances of success with this legume in North Carolina are slim.

Question: Can I use carpet grass for my lawn in Winston-Salem? Can it be planted for forage?

Answer: About the only place car-

pet grass is suitable for lawns is in the Eastern part of the state. Farmers have pretty well gotten away from it as a forage plant in North Carolina because other plants such as orchard grass and tall fescue respond to fertilization and produce a lot more forage under average conditions than does carpet grass.

Question: Have you any tips for selecting a site for the home garden?

Answer: These five suggestions should be of help: 1. Select an area with good soil if possible; 2. If space is available, plan to rotate your garden to prevent disease build-up, especially nematodes; 3. Keep garden near the house. If possible, locate

garden where it can be irrigated; 4. Sites near top of hill will escape early and late frosts; 5. Full sun is best. Stay away from trees and large shrubs.

4-H Club Laying Flocks Doing Well

Chowan County 4-H Club members yours stays too late when he ca in general are doing well with their Hasn't your mother something to say laying flocks. Wesley and Millard to you about that?" Layden, of Gliden community, had the Mabel—"Yes, father. Mother says top egg production for February with men haven't changed a bit."

an average of 61.3%. Joseph Wiggins of Center Hill and Gerc Harrell of Ryland tied for second place with a production of 58.4%. Barbara Jordan of Ryland had sickness develop in her flock and her production was 35.8%.
