

## Swine Grazing In Chowan Profitable

### L. C. Bunch Completes Successful Grazing Demonstration

"Grazing ladino clover pays in pork production," says County Agent C. W. Overman.

Mr. Overman points out that Lloyd C. Bunch of the Enterprise community completed a demonstration on June 18. On April 7, 40 shoats weighing approximately 3,544 pounds were placed on three acres of ladino clover pasture. They received a full feed of corn and protein supplement. On June 18 the hogs were sold. They weighed 7,285 pounds, a gain of 3,741 pounds.

During the feeding period the 40 hogs consumed 229 bushels of corn and 1,600 pounds of supplement. The corn cost \$399.75, the supplement cost \$91.00, making a total feed cost, other than clover, \$490.75. This was an average cost of \$13.12 per 100 pounds of gain.

The three acres of pasture was excellent. It would have supported at least twice as many hogs which means that not more than half of the value of the clover was obtained. In addition, the hogs had a reaction from vaccination which set them back at least two weeks, in Mr. Bunch's estimation. Lloyd is convinced that feeding hogs out on ladino clover pays good dividends.

## HAYSEED

By UNCLE SAM

The Fourth of July is officially set aside and known as Independence Day. On this day set aside to celebrate independence there were parades, there were bands, there were flags and decorations, there were patriotic speeches. With many this is an idle gesture for the spirit of independence, freedom and self-reliance is being frowned upon and argued against. Far too many people think they prefer security instead of independence.

Perhaps it would be just as correct to shorten the word Independence Day to Dependence Day and instead of celebrating it, just observe it. Observe it on account of the government's socialistic policies and endless number of controls. Observe it on account of its controlled production of food and materials. Observe it on account of its controlled prices. Observe its regulations controlling labor and who may and who may not work. Observe it for its free handouts. Observe it for its policy of unnecessary and extravagant spending. Observe it on account of its excessive and almost confiscatory taxation. By lack of appreciation and by indifference we have passed from independence to dependence.

There was a day when patriotic songs were taught in the schools. There was a day when rulers were respected. There was a day when reverence was shown for heroes. There was a day when we refrained from meddling in the affairs of other nations. There was a time when we were feared and respected by all nations. There was a day when we spoke softly and carried a big stick instead of boasting and waving a fast-shrinking dollar bill. It may be a long way back to independence and what Independence Day once stood for but unless we can regain our spirit of independence we are living in dependence, awaiting the time of our annihilation.

### Summer Theatres In State Now Showing

Drama under the stars is again attracting large crowds in North Carolina's mountain and coastal vacation lands, where three big outdoor dramas reopened the last week in June and will play six nights weekly through the first week in September.

The dramas are "The Lost Colony" at Manteo, on Roanoke Island, nightly except Mondays through September 5;

### TREATING TRENCH MOUTH By Science Features

During World War I many soldiers suffered from an infectious mouth disease that they promptly called "trench mouth" in honor of their living conditions. Since 1918, trench warfare has become obsolete but the disease, more properly known as Vincent's infection, is still common today.

The exact cause is not clear, but "trench mouth" usually results from crowded, unsanitary conditions, poor oral hygiene, vitamin deficiency and fatigue. These facts can be found at home as well as on a battlefield.

Vincent's infection appears abruptly, producing a painful inflammation of the gums which become very sensitive and bleed easily. The infection can destroy much of the tissue around the teeth and also affect other areas of the mouth.

In treating the disease the gums are always cleaned. With the discovery of antibiotics, penicillin was successfully used but now two New York dentists report that tetracycline gives even better results. The investigators tested the wide-range drug in 42 cases of Vincent's infection. Gum areas of 39 patients that were treated with tetracycline began healing within 48 hours while unmedicated sections took much longer. Periodic dental check-ups can prevent development of this infectious disease. There is little reason today why trench mouth should not become as outdated as trench warfare.

## 60 - SECOND SERMONS

By FRED DODGE

TEXT: "He who foresees calamities, suffers them twice over." —B. Portius.

A young matron thought she was getting used to the odd actions of day help, but she was frankly puzzled by the new housemaid who continued to work with her hat on. Finally, she ventured a question.

"Mona, why do you wear a hat in the house? I prefer that you take it off when you come to work in the morning and leave it off until you go home."

"Taint hurtin' nothin'," snapped the maid. "And I want it on, 'cause ef you can use less."

Grind it fine, and you'll get more coffee out of each pound.

Cut down on waste by measuring accurately. Find the lowest strength that satisfies and use the same measure each time.

Remember that coffee evaporates and gets bitter when too often reheated. Try to make no more than you are going to drink each time.

If you use the drip method, use a little less coffee and pour the liquid through twice.—Changing Times.

fen anybody insults me, I'll be ready to leave right off."

Some folks go through life just like that maid. They "carry a chip" on their shoulders, daring anyone to knock it off. Anyone can find trouble if they go looking for it. There are some who never meet trouble because they do not recognize it when it comes. That is one snub that will lead to a happier life. When trouble goes out of its way to confront you, that is time enough to grapple with it. But to foresee calamity, insults and trouble, constantly, is to suffer them twice over.

### Cheated!

For many years a rancher employed a Chinese cook. After an unusually good dinner the rancher decided to raise his wages. The next pay day the cook noted the extra money in his envelope. "Why you pay me more?" he asked.

"Because you've been such a good cook all these years," replied the boss. After thinking it over for a while, the Chinese said: "You been cheating me long time, eh?"

Prosperity tries the fortunate, adversity the great. —Pliny.

## POLIO STRIKES WITHOUT WARNING

Our policy pays \$10,000 of your polio bills

for each member of your family so afflicted. Costs but a few cents per day.
