

## FUGITIVES FROM BEHIND IRON CURTAIN HELP ARMY GUARD AGAINST RED ATTACK

Heidelberg, Germany—Hundreds of means working for the U. S. Army Germany have true life stories that top the best Hollywood thrillers in suspense and intrigue.

Many are refugees from behind the iron curtain and can weave true tales of escape. Others tell of the World War II battles and sorrows that ended in a mass transplanting of humans all over Europe.

Professional people, clerical workers and unskilled laborers, these refugees and displaced persons are used in the Army program aimed at utilizing available native workers.

Walter Arnold, a German now working as a draftsman at the Seventh Army tactical headquarters in Stuttgart, tells of more than two years spent as a Russian prisoner of war near the Black Sea. Before capture by the Russians, he worked on top-secret battle maps for nine different German generals.

A former conductor of several of the outstanding symphony orchestras in Czechoslovakia and Germany now is teaching music in an Army school at Munich. Paul Engler, 61, has conducted the Handel Symphony Orchestra of Dresden, the Civic Symphony Orchestra of Marienbad, Czechoslovakia, and Philharmonic groups in Prague, Baden-Baden, Stuttgart and

Berlin. Celestine Splawski works as a safety inspector in Central Germany and has not been home to his native Poland since the Germans made him a prisoner of war in 1939.

After spending five years as a prisoner in Russia, Paul Goetz returned to Germany in 1950 and now manages a metal plating plant for the Army in Munich.

Goetz established the plating plant which now employs 25 other Germans to clean, replate and resilver tools and utensils at a 75 per cent saving of the price charged by commercial firms for such work.

A chemical engineer who fled his native Budapest after Communists took over Hungary supervises water purification and other chemical work for the Army in Munich. More than 600 Europeans work under his supervision throughout Bavaria—600 positions that are filled with economical labor and that free 600 soldiers for duty with tactical units.

Wolfgang Pachla fled East Germany in 1948 to work for the U. S. Army in Southern Germany. A fluent linguist in Russian, Estonian, French, English, and German, he is employed as a translator and interviews European job applicants for placement with the Army.

omists says when drying blankets, Mrs. Homemaker should keep the following points in mind:

1. A shady spot in a gentle breeze is just right for blanket drying—do not hang the blankets outside in a high wind or in direct sunlight.

2. If possible, hang the blanket lengthwise over two parallel clothes lines that are 2 or 3 feet apart.

3. To keep that fluffy newness, when dry brush the blanket on both sides with a stiff brush.

Now for actual washing procedure, home economists say:

1. Fill the washer with water. Add a normal sudsing synthetic detergent and run the water a minute or two until washing product dissolves.

2. Stop the machine. Add the blanket and let it soak 15 to 20 minutes depending upon the amount of soil.

3. Start washing action and let the machine run for 15 to 30 seconds (¼ to ½ minute).

4. Extract the water from the blanket by setting the machine for the full spinning period.

5. Refill the washer with lukewarm water for rinsing—set the timer dial to fill for deep rinse. Agitate the blanket for only 15 to 30 seconds. Extract water.

6. Rinse a second time. Dry.

### Boll Weevil And Red Spider Show More Damage To Cotton

#### Cotton Insect Survey Is Made Monday By Chowan County Agent

The boll weevil and red spider are increasing. Continue dusting this week and next, County Agent C. W. Overman advises.

The cotton insect survey made on Monday shows the boll weevil is increasing in undusted fields and partially dusted fields. Eight fields

which have been dusted regularly had an average punctured square count of 3 per cent. Five undusted fields had an average punctured square count of 55 per cent. The count in the regularly dusted fields is practically the same as last week but the punctured square count in undusted fields has risen from 34 per cent to 55 per cent. One undusted field had a punctured square count of only 4 per cent while the other three ran 53, 55, 78 and 84 per cent respectively. The highest punctured square count in the regularly dusted fields was 4 per cent.

Red Spider is working in many fields and in some fields have defoliated plants in some spots. Growers who have dusted with 25 to 30 pounds of sulphur per acre have generally brought the insect under control. Some few have had to make a second application.

Growers should watch their fields carefully for red spider. Dust with 25 to 30 pounds of sulphur containing 5 per cent DDT will control both the red spider and the boll worm. The cotton dusting program should continue this week and next to protect the late formed bolls.

#### 4-H PROJECTS MEASURED

Several 4-H corn and peanuts were measured by Assistant County Agent Robert Marsh last week. Peanuts are looking very well. However, the extreme drought has damaged the corn yield considerably.

The right thinker and worker does his best, and does the thinking for the ages. —Mary Baker Eddy.

### Legal Notices

#### ADMINISTRATRIX NOTICE

Having qualified as Administratrix CTA of the estate of William A. Munden, deceased, late of Chowan County, North Carolina, this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned at Edenton, North Carolina, on or before the 28th day of July, 1955, or this notice will be pleaded in bar of their recovery. All per-

sons indebted to said estate will please make immediate payment.

This July 28, 1954.  
MILDRED G. MUNDEN  
Administratrix CTA of  
Wm. A. Munden Estate  
Aug 5, 12, 19, 26, Sept 2, 9c

#### ADMINISTRATOR'S NOTICE

Having qualified as Administrator of the estate of Clara L. Bunch, deceased, late of Chowan County, North Carolina, this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned at Edenton, North Carolina, on or before the 29th day of July, 1955, or this notice will be pleaded in bar of their recovery. W. M. HOLLOWELL,  
Administrator CTA of Inez White Estate.  
W. A. HOLLOWELL, Attorney.  
July 8, 15, 22, 29, Aug 5, 12c

**Dust and Dirt**—Dust and dirt are twin enemies of home beauty. Yes, dust and dirt are different. Both can be the means of harming furniture and furnishings, especially rugs and draperies.

Rugs and carpets subject to heavy traffic should be cleaned as often as twice to three times a week—daily with a carpet sweeper or vacuum would be better. Regular and careful cleaning prolongs wear to say nothing of giving the home a well-cared-for atmosphere.

Keeping carpets and rugs clean, free from dust and dirt, will pay big dividends in longer wearing years.

**Moth Damage**—Moth damage is costly. Moths thrive on woolsens, fur, mohair, clothing and floor covering.

**Electric Cords and Plugs**—A frayed and broken electric wire may cause shock and fire. Never place an electric wire under a rug on which the members of your household walk daily as the covering will wear away, and the wires will become exposed, rub together and ignite. It's hazardous, too, to use plugs without handle or grips. When you're removing the plug from the outlet, you're apt to pull the cord out of the plug if it doesn't have a handle.
