

## Miss Lillian Haynes Weds Wade Jordan Ceremony Performed In Goldsboro Sunday, August 22

Miss Lillian Cecilia Haynes, daughter of Mr. and Mrs. Lewis A. Haynes of Goldsboro and Wade Hampton Jordan, Jr., son of Mr. and Mrs. Wade Jordan of Edenton, were united in marriage in the First Baptist Church in Goldsboro Sunday, August 22. The Rev. Gilmer Cross officiated, using the double ring ceremony.

A program of wedding music was presented by Miss Ellen Sprinkle, organist of the church, and Mrs. Henry Modlin, Jr., was the soloist.

The bride, given in marriage by her father, wore a dress of tulle and cobweb lace over satin. The bodice and sleeves were made of Katy Chantilly lace with insets of the lace encircling the Robbin's nylon tulle skirt and dropping at a point in the back. An upstanding band of lace softened the wide neckline which was filled in with tulle. The bridal veil of illusion was attached to a tiny tulle-edged lace cap to match the dress. She carried a white Bible topped with a white, purple-throated orchid and showered with white satin ribbon.

The bride was attended by her matron of honor, Mrs. Ralph Rumer, Jr., sister of the bride. Her dress was of nylon net, trimmed with satin dusty rose and fashioned with a strapless bodice with a matching stole.

Bridesmaids were Miss Mary Lou Jordan, of Edenton, sister of the bridegroom; Miss Anna Avant of Whiteville and Mrs. Rudolph Scheller of Greenville, both East Carolina classmates. They wore dresses fashioned like the matron of honor with pink net and matching stoles.

The senior attendants carried cascade bouquets of pink asters and lilies, and the junior attendant carried a white basket containing white and pink asters and trimmed like the senior attendants. The matron of honor's bouquet contained dark blue asters and lilies.

Honorary bridesmaids were Miss Carolyn Malpass and Miss Geraldine Price of Goldsboro and Miss Marjorie Winslow of Hertford. They wore afternoon dresses in pastel shades.

The bride's mother wore a street-length dress of pink embroidered eyelet with pink and black accessories. She wore a corsage of white roses. The bridegroom's mother was dressed in a navy crepe dress, street length with navy and white accessories. Her corsage was white roses.

Best man was Richard Hoskins of Edenton. Ushers were Ralph Rumer, Jr., of West Whiteland, Pa., Kelly Wallace, Jr., of Aurora, James Clapp of Chapel Hill and Gene Ward of Edenton.

After the ceremony the parents of the bride entertained at a reception honoring the couple in the social room of the First Baptist Church.

The bride wore for the wedding trip a sheer pink cotton afternoon dress with white accessories.

Mrs. Jordan is a graduate of East Carolina College where she received her B.S. degree in science. She is employed as a laboratory technical assistant at State College, where she will begin work this September.

Mr. Jordan received an A.B. degree at East Carolina College. He is a member of Who's Who in American Colleges and Universities and belongs to Chi Beta Phi, honorary science fraternity, of which he is president. He is entering the graduate school of the University of North Carolina this fall as a Morehead Scholar, and will further his education in chemistry. At present he is employed as a chemist at Liggett & Myers Tobacco Company in Durham.

The newlyweds will make their home in Chapel Hill.

After the rehearsal on Saturday night, Mrs. W. A. Powell and daughters, Jean and Katherine, entertained

the wedding party and out-of-town guests at a cake cutting. The bride-elect was presented a corsage of white asters.

The hostesses served delicious refreshments consisting of punch, cheese straws, nuts, mints and wedding cake.

## Louise L. Chappell Weds Gary Martin

Mr. and Mrs. John McClenney announce the marriage of their son, Gary Linwood Martin, to Louise Leland Chappell, daughter of Mr. and Mrs. McElroy Chappell, Route 2, Hertford.

The wedding was solemnized Monday, August 23, at the residence of the Rev. D. Virgil Pike in Hertford.

The newlyweds will live in Greenville where the bridegroom will attend East Carolina College.

## Capsule Facts On '53 Traffic Accidents

North Carolina's traffic death rate per one hundred million miles of vehicular travel in 1953 was 7.7, a four percent decrease from the previous year. Tar Heel motor travel last year came to more than 14 billion miles, according to a report by the Motor Vehicles Department. The national death rate for last year was 7.0.

## Farm Machines Make Difference

Farm labor these days is relatively expensive, with wage rates more than four times as high as before World War II.

During the same period prices of machinery, including tractors, have almost doubled, and prices of motor supplies, including gasoline and other fuels, have increased about 50 per cent.

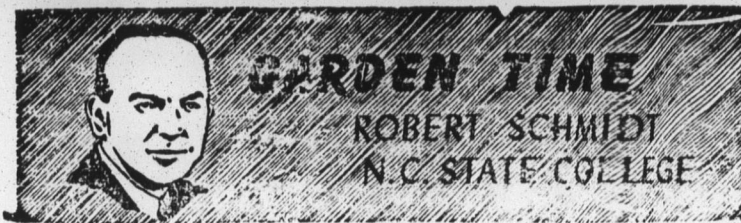

C. W. Overman, Chowan County farm agent for the State College Extension Service, says the amount of labor saved by "letting machines do the work" will continue to be an important consideration in farm planning.

Overman says recent USDA figures indicate that for most field crops a good deal less labor is now required per acre than in the 1910-14 period. The almost complete conversion from horses and mules to tractors, trucks and other machines is the main reason for the big drop in labor requirements.

The greatest decrease in labor has occurred in the production of small grains and other crops similarly produced, says Overman. Corn, for example, now requires only 37 per cent as much labor as in 1910-14.

Tobacco is at the opposite end of the scale. It is chiefly harvested by hand and a significant increase in yield has resulted in more man-hours per acre. However, the increase in hours has been more than paid for by increases in yield.

The development of practical tobacco harvesters is expected to bring about a more rapid change in the tobacco-labor picture.

GARDEN TIME  
ROBERT SCHMIDT  
N.C. STATE COLLEGE

In the vegetable garden now is the time to practice sanitation—a thorough clean-up of all plants which have matured their crop and are through for the season. For example, beans, melons, cucumbers, summer squash and others.

If these old plants are allowed to remain they will carry over many insect pests and diseases into next season. They may be plowed under or composted with a little manure and soil. This will take care of the pests and at the same time supply much needed organic matter for the garden. Just because plants are through producing for the season, it is a mistake to let them remain to become a breeding place for insects and diseases which will give you trouble next year.

In eastern and central North Carolina there is still time to plant such crops as turnips, mustard, spinach,

## Third Of All Home Owners Newcomers

More than a third of all home owners are newcomers in their present residences, according to the Consumer Finances Survey of the Federal Reserve Board. This indicates the magnitude of the changes that are being brought about throughout the land by a combination of the building boom, suburbanization and the innate mobility of the American people.

The figures, gathered early this year, show that 15 per cent of the home owners had lived in their homes less than two years, and that 21 per cent more had occupied their present houses only between two and five

years. Of these two groups, about two out of every three were younger families, many of them headed by veterans.

Chinese cabbage, cabbage (plants), collard (plants), broccoli (plants), beets, snap beans, kohlrabi, kale, shallots, onion sets, leaf lettuce and radishes.

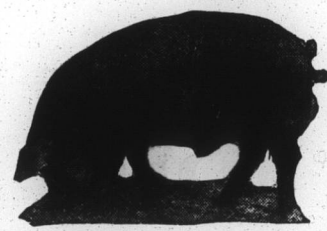

In the flower garden this is a good time to plant seed of spring and early summer blooming perennials. If these seeds are planted now in flats, cold-frames, or well prepared seed beds, and transplanted as soon as they are large enough to handle, they will bloom next year. If you plant the seeds in the spring most of these plants will not bloom until the following year.

Also, September is a good time to plant seed of pansies and the winter annuals such as annual larkspur, annual phlox, shirley poppies and cornflower. Pansies should be transplanted but the others may be left as seed.

They are all hardy to winter temperatures. All of these are early spring bloomers.

He that can have patience can have what he will. —Franklin.

## SECOND HIGHEST WHEAT YIELD

The State's wheat crop is now estimated at 6,794,000 bushels—17 per cent below the 1953 production and 2 per cent below the 10-year (1943-52) average production of 6,915,000 bushels. Based on current reports, the 1954 average yield per acre is placed at 21.5 bushels—the second highest of record, being exceeded only by the 1951 yield of 23.0 bushels per acre.

## KIDNEYS MUST REMOVE EXCESS WASTE

When kidney function slows down, many folks complain of nagging backache, loss of pep and energy, headaches and dizziness. Don't suffer longer with these discomforts. If reduced kidney function is getting you down—due to such common causes as stress and strain, over-exertion or exposure to cold. Minor bladder irritations due to cold, dampness or wrong diet may cause getting up nights or frequent passages.

Don't neglect your kidneys! If these conditions bother you, try Doan's Pills—a mild diuretic. Used successfully by millions for over 50 years. While often otherwise caused, it's amazing how many times, Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and filters flush out waste. Get Doan's Pills today!
