

SOIL CONSERVATION NEWS

By JAMES H. GRIFFIN, Soil Conservationist

White, Jr., has just completed livestock watering ponds on his farm in Center Hill community. These ponds are 40 feet deep and 10 feet wide. They are designed to furnish water for 200 head of cattle. Before the ponds were dug, Mr. White had to haul water to his livestock. Most of the time the livestock drank while on the farm during the winter had to be hauled to them. Hauling water to the livestock can be quite a job. Mr. White has plenty of fresh water for them.

White is busy now clearing the woodland on his farm. This fall some of it will be used to pasture for the livestock. The pasture will be located near the watering ponds.

White plans to locate his ponds so he can irrigate his tobacco and sweet potato beds. This is another good use of the ponds. This size pond (120') will not furnish enough water to be used for irrigating in the field but will be enough to plant beds and still leave water for the livestock to drink. This will help pay part of the cost of the ponds because it is one of the practices approved for use in the county.

White is planning to do something this fall also. His fields are "silted in" and need to be re-located to improve his yield on the farm. This work starts as soon as the crops are harvested.

Her farmers are now making plans for open ditch drainage this year. John Raines and H. V. Bass Paradise, Jake Stallings of Edenton, L. E. Francis of Macclesfield, Walter Moore of Center Hill and Wallace J. Chappell of Gliden

communities have all asked for open ditch drainage on their farms through the ASC office in Edenton. Others who need open ditch drainage or other practices should make their plans now.

J. D. Ward and E. M. Ward are planning to install tile on their farms this fall. Since we do not have a tile machine in the county it will be necessary for all the tile to be installed when we get the machine to come into the county. Farmers who are planning to install tile this fall should contact the Soil Conservation Technician as soon as possible and let your plans be known.

W. H. Parker, L. C. Bunch and T. B. H. Wood are planning livestock watering ponds to be constructed this fall.

Now is the time to make plans to do those fall and winter jobs on the farm.

Good planning always pays and is a good preventive of disappointment.

Annual Conference Of MYF Aug. 15-19 At Duke University

The N. C. Conference Methodist Youth Fellowship will hold its fourth Annual Conference Session at Duke University, August 15-19.

Some 450 high school and college young people from eastern North Carolina will gather during the five-day program to plan the overall program of the Fellowship and to elect and install officers.

On the final day more than 1,000 youth delegates and their adult leaders will assemble for the 10th annual Conference Rally, which will include messages by Bishop Paul

EASING THE LOAD—The soldier striding along with the full food container on his back moves with comparative freedom and ease, thanks to a simplified load-carrying device developed by Army Quartermaster Corps. Light in weight and simple to adjust, the carrier is a seven-foot length of webbing equipped with metal load-spacers and a snap by which it is fastened around the shoulder. It may be used by an individual or a team of two to carry ammunition, machine guns and tripods, mortars and mortar base-plates, rations, water and fuel cans or litters in combat areas.

Neff Garber, of the Methodist Church's Richmond Area, and the Rev. A. Purnell Bailey, pastor of the Centenary Methodist Church, Richmond, Va.

Rev. Bailey also will serve as principal speaker during the five-day meeting, which will include discussion groups, committee meetings, business sessions, a mission night, a United Nations night, a folk festival, recreational fellowship periods and worship services.

Tree Planting In South Reaches An All-Time Record

181,856,000 Trees Are Planted In 11 States

The southern pulp and paper industry accounted for 181,856,000 trees being planted over an 11-state area in 1954-55, an all-time record for this region, according to the Southern Pulpwood Conservation Association.

H. J. Malsberger, forester and general manager of SPCA, who made the survey, said, "Planting records show that 50 pulp mills and 31 suppliers of pulpwood from

Virginia to Texas exceeded their 1954 record by over one and one-half million trees."

It was estimated that the planting program covered 300,000 acres. The survey revealed that industry planted on its own lands 133,307,000 trees while pulpwood suppliers planted 4,820,000. The pulp and paper industry gave private landowners 42,904,000 trees while suppliers contributed 825,000 trees, a combined total of 43,729,000 trees given to landowners free.

Malsberger explained that the planting program provided immediate cash benefits for every state as well as boosting future southern economy with more tree crops. He explained, "Of the 181,856,000 trees distributed, 147,093,000 were seedlings purchased from state-owned nurseries. The industry raised the remaining 20 per cent in its own nurseries."

The growth of the tree-planting program has increased greatly

within the last five years, according to Malsberger. In 1950 the pulp and paper industry planted 61 million trees as compared to the 181 million this year. The SPCA general manager added that the figure would be larger if records showed the number of trees industry supplied free to private landowners on a matching basis. That is, the mills match that number of trees bought by a farmer for his land with a similar number of trees.

The program accounted for the planting of the following number of trees by states:

Alabama	14,756,000
Arkansas	6,517,000
Florida	39,399,500
Georgia	44,681,200
Louisiana	13,645,300
Mississippi	15,458,000
North Carolina	14,311,000
South Carolina	12,417,000
Tennessee	3,595,000
Texas	8,773,500
Virginia	8,302,000

FISHING TIME

Vacation time brings out fishing poles and cool, cotton sportswear. This fisherman wears a comfortable cabana outfit designed by Catalina in colorful Lowenstein "Signature" fabric. The short sleeve shirt features big, useful pockets, and the shorts are neat boxer style.

FURNACE HEAT

No costly pipes or registers to install or clean!

Siegler

PATENTED AUTOMATIC OIL HEATERS

Tropical Floor Heat

GETS TO THE BOTTOM OF THE COLD FLOOR PROBLEM

Siegler is not a space heater that wastes heat up the chimney and on the ceiling forcing you to live in one or two rooms.

Siegler is not a central heating plant with expensive installations—

SIEGLER is a revolutionary method of WARM FLOOR HEATING in every room!

JUST LIKE A FURNACE . . . BUT WITHOUT COSTLY, DIRT COLLECTING PIPES AND REGISTERS!

A FURNACE JOB OF HEATING FOR THE PRICE OF A HEATER!

Cadillac

The Great Practical Luxury!

This message is addressed particularly to those who have been thinking about purchasing a Cadillac—but who, for one reason or another, have not considered acting on the impulse this year.

For you, there is interesting and valuable information in the paragraphs which follow.

In the first place, there is no reason why anyone should ever put off ordering a Cadillac—once the decision for ownership has been made. For a Cadillac represents one of the soundest and most practical investments in the automotive world.

You can become the owner of a 1955 Cadillac for little more than you would pay for many so-called medium-price cars.

And this is only half the picture, insofar as cost is concerned. For when the time comes to sell your Cadillac, you will find that the car has held its value far beyond anything you could logically expect.

* Authoritative price figures, based on year-after-year studies, reveal that a Cadillac may be expected

to return its owner a larger share of his original investment than any other motor car built in the land.

And then consider Cadillac's economy of operation.

The car will run as far on a gallon of gasoline as most standard automobiles—and it is so soundly built and so soundly engineered that it is all but free from any save routine service requirements.

And here is the most interesting news of all: If you act quickly, the chances are that you can get early delivery of a 1955 Cadillac!

True, we have a backlog of Cadillac orders—but many of these are for future delivery or for special combinations not now available.

So—if you have thought of owning a Cadillac—come in now. Because of our low used car inventory, we are in an excellent position to make you a liberal allowance on your present car.

We have a Cadillac waiting to give you the most thrilling demonstration of your life. Why not make it today?
