

NO COMMENT
By JAMES W. DOUTHAT

Washington—Economy advocates are planning an intensified drive in the next session of Congress for adoption of more of the Hoover Commission recommendations—in order to lighten the burden on the American taxpayer and improve

the efficiency of the government. It is unofficially estimated that approximately thirty-five per cent of the Hoover Commission recommendations have been adopted thus far by Congress and the Executive Departments—for total potential savings of \$532,600,000 annually. But additional recommendations must be made effective to modernize federal operations, eliminate waste and duplication, and get the government out of dangerous competition with private business. Such action will aid in cutting

to consider tax cuts. The platform adopted by the Republican National Convention contains a specific commitment that the party will support the commission's proposals. Here is what the Republican platform said: "Efficiency and Economy in Government: We pledge to continue our far-reaching program for improving the efficiency and the effectiveness of the federal government in accordance with the principles set forth in the report of the Hoover Commission. "We are unalterably opposed to unwarranted growth of centralized federal power. We shall carry forward the worthy effort of the Kestnbaum Commission on Intergovernmental Affairs to clarify federal relationships and strengthen state and local government. "We shall continue to dispense with federal activities wrongfully competing with private enterprise, and take other sound measures to reduce the cost of government." The Democratic platform did not mention the Hoover Commission specifically, but said: "The Democratic Party pledges that it will return the administration of our national government to a sound, efficient and honest basis. . . Taxpayers, paying billions of dollars each year to their government, demand and must have the highest standards of honesty, integrity and efficiency as a minimum requirement of federal executive conduct." Action taken thus far involves 112 of the 314 recommendations made by the Commission on Organization of the Executive Branch of the Government, popularly known as the Hoover Commission. Improvements have been made to date in the government accounting system, food supply management, surplus property, and legal services and procedures. Chief among 1956 legislative accomplishments was enactment of

the Kennedy-Payne bill to modernize obsolete federal budget and accounting procedures. Cost of the commission has been a good investment for the taxpayer. Potential annual savings of \$532,600,000 are already in sight. But the commission performed its task on a Congressional appropriation of less than \$2,800,000. Thus it has paid for itself many fold, and adoption of additional proposals will increase the value of the investment.

Sports Afield

By TED KESTING
Editor Sports Afield Magazine

A houseboat is built for one purpose—to be lived in. It can be a home, it can be your fishing lodge, or your hunting cabin. You can move around any time without setting your feet against roll or sway under you. You have everything of the shore cabin except the cracking log fire. But to compensate for this—right outside you have fishing.

Anyone thinking about a houseboat should consider most carefully certain aspects of the waterway it will be used on. Slip up and you may have to trade it for a smaller one, or haul it to another river or lake. That can be more expensive than you think.

Make sure that the whole length of the waterway is navigable for your houseboat. And remember, river channels have ways of changing. Nonnavigable waters might have a bridge that's too low. Don't think that this isn't important since you plan to just live aboard and not move. When you find low economically and smoothly your houseboat moves and what comfort it brings along, you'll want to take water trips, insists Willard Crandall, boating editor of Sports

Afield.

Be sure good mooring places are available. These should be sheltered, have free access to a nearby landing, and be not too far from a couple of places where the houseboat could be hauled out. If the water is navigable you may have to get permits to moor.

For all except the largest houseboats, an outboard is ideal power. It can be mounted on the craft; or the houseboat can be moved by simply putting the motor on any small boat and towing. Most houseboat owners want to keep a small outboard boat tied on, anyway. It's a good idea to have two outboard motors, one for the houseboat and one for the small utility.

Some of the larger river houseboats take an inboard motor. There's more room for it, the weight of it becomes less significant, and it adds little to the draft.

TO SING SUNDAY

The Gospel Trumpets, local quartet, has reorganized and will appear at the Pleasant Grove A.M.E. Zion Church at 3 o'clock Sunday afternoon, October 21st. The public is cordially invited to attend and hear the performance.

Peanut Production Highest Since 1951

Forecast as of October 1 Estimates Crop of 303,800,000 Pounds

Based on condition and yield reports from growers as of October 1, peanut production is forecast at 303,800,000 pounds—49 per cent above 1955, according to the N. C. Crop Reporting Service. A crop of this size, if realized, will be the largest since 1951 when more than 322 million pounds were produced. Yield per acre is indicated at 1,550 pounds per acre, compared with 1,075 pounds in 1955 and 1,218 pounds for the 10-year average. Throughout the growing season conditions were mostly favorable for a good yield, especially in the heavy producing commercial counties of the Coastal Plains.

Time Now Ripe To Get Scarce Tree Seedlings

"Forest tree seedlings are going like hotcakes this year," says John Gray, Extension specialist in charge of Forestry Extension at North Carolina State College. Landowners have already ordered over 80 per cent of the total supply available from the public nurseries, reports Gray. This is true despite the fact that the tree planting season will not start until December.

If you are planning to put land in trees this winter, get an order blank from your county agent or county forest ranger, fill it out, and send it to the State Forester at Raleigh right away, advises Gray.

Although all longleaf pine have been sold out, Gray indicates that 6,000,000 loblolly pine seedlings are available for purchase, along with 4,000,000 slash pine seedlings, and 100,000 red cedar seedlings.

Except for those seedlings set aside for 4-H club members and FFA boys, all white pine and shortleaf pine have been sold out. Gray adds that plenty of loblolly pines

are still available to these two groups. These trees are available free to 4-H and FFA members through courtesy of the pulpwood industry.

Another indication of the tight supply of tree seedlings, says Gray, is found in yellow poplar. All have been sold out except for a small amount still available to adults through courtesy of the Furniture and Veneer Council of the North Carolina Forestry Association.

In Southern North Carolina, the total allotment of free pine seedlings made available to landowners on a matching basis through the courtesy of the International Paper Company has been exhausted.

"If you want to plant trees," says Gray, "act now."
