

Farmers Reminded To Vote In Cotton Election Dec. 11th

Polls In County Will Be Open From 8 A.M. Until 7 P.M.

How farmers vote in the cotton marketing quota referendum to be held throughout the Nation's cotton-growing area on December 11 will determine whether quota penalties will apply and also the level of price support for 1957-crop cotton. The referendum therefore is of vital concern to every cotton grower, says A. C. Griffin, Chairman of the Chowan County Agricultural Stabilization and Conservation Committee.

The marketing quota program will be in operation for next year's crop, the Chairman explains, if at least two-thirds of the votes cast in the referendum are in favor of the program. In that case, price support will be available for the 1957 crop of upland cotton at a level between 75 and 90 per cent of parity and quota penalties will apply on any "excess" cotton. If more than one-third of the votes are against quotas, there will be no quota penalties but the price support level to eligible growers would drop to 60 per cent of parity.

Chairman Griffin explains that, even though quotas are disapproved, acreage allotments will remain in effect as a means of determining eligibility for price support. All farmers who engaged in the production of cotton in 1956 will be eligible to vote in the referendum.

The referendum will be held between the hours of 8:00 A. M., and 7:00 P. M., on December 11.

Christmas Mailing Mounting At P. O.

Postmaster J. L. Chestnut said Monday that the mounting volume of Christmas mail makes it vitally important for everyone to help on his "Mail Early For Christmas" program. He said, "Last year we handled a total of 186,000 pieces of mail between December 1st and the 25th. This year we have already received and sent several thousand Christmas cards, letters and packages, and the real heavy rush is just starting. We can make it a

On the one hand, there is a demand for feather lightness in weapons; on the other hand, the demand is for greater power in the cartridge. If the shooter should ever get the two extremes on the one hand there's liable to be some misplaced anatomy.

Super-powered cartridges, says Pete Brown, arms editor of Sports Afield Magazine, would beat a shooter to death if chambered in what is now considered a light-weight weapon. This brings up the subject of butt-end reaction—namely, recoil, or "kick".

Recoil can be calculated with a reasonable degree of accuracy. But what do we mean by "kick"? Let's say that kick is what we personally feel whether it's applied to the shoulder by a gun or to the seat of the pants by a well-directed

boot. Because of their individual makeup, physical and mental, people feel recoil differently. It is hard to say just how much recoil the average hunter is willing to take. Some are willing to take added recoil in order to have a light weapon, and I would say that the greatest emphasis at the present time is on lightness. Other

ers will accept added recoil in the interests of more power. When hunting game such as the big African trophies, the hunter should be willing to accept more recoil along with a heavier rifle. Shooting at dangerous game, a 60-foot-pound recoil energy is not out of place. Bird shooting, however, frequently calls for overhead shots where the recoil tends to pile-drive a shooter to the ground instead of permitting him to roll with the punch.

Possibly you have heard talk concerning minimized recoil effect with the autoloading guns. You may wonder if the reduced recoil effect is accounted for in reduced ballistics at the muzzle end. The answer is No.

One thing is certain. If you want to follow the modern trend toward weapon lightness for our most popular American hunting, you will find it necessary to leave some of the modern power behind, unless you want to take a lot of recoil punishment.

Easy Victory

A decrepit horse was being offered to the highest bidder. An old farmer watched as a young man in riding breeches bid for the animal. When the sale was completed he turned to the young fellow.

"Tell me," he said, "what on earth are you going to do with that nag?"

"Oh," replied the cocky young sportsman, "I'm going to race him."

The farmer took a second look at the animal. "Well, you'll win," he said.

Jimmy Earnhardt, Jr. Speaker At Rotary

Jimmy Earnhardt, Jr., was the principal speaker at last week's Rotary meeting, being introduced by

his father, who had charge of the program. The speaker recently returned to Edenton after a tour with the U. S. Navy and delightfully entertained the Rotarians telling about some of his travels and experiences while in the service.

CHRISTIAN SCIENCE
The Christian Science Assistant Committee on Publication for this area announces TV and radio program, "How Christian Science Heals", given Sundays over WITN-TV at 2 P. M., and radio station

WPTF (Raleigh) at 9:15 A. M. The Christian Science textbook, "Science and Health with Key to the Scriptures", by Mary Baker Eddy, can be purchased or borrowed by calling Edenton 3192.

This is another in the series of advertisements published by this newspaper, a member of the North Carolina Press Association, as a public service in the interest of the State's industrial development.

The Research Triangle

NEW SCIENTIFIC HEART OF NORTH CAROLINA'S FORWARD MARCH

Dedicated men and women, at work with fantastically complicated instruments and simple test tubes, are shaping a brighter future for every North Carolinian. In the seclusion of great public institutions and in private laboratories from the Great Smokies to the Atlantic Ocean, they are creating the miracles of modern science. They are the brains, the flesh and blood, of the Research Triangle. Their work has already made every book, every article, about North Carolina's economy that was written even a year ago out of date. The Research Triangle is a new and dynamic North Carolina First. Every citizen owes it to himself to know what it is, and what it means to his and his State's future.

Governor Luther H. Hodges, who leads North Carolina's development program, invites you to write for the new RESEARCH TRIANGLE booklet.

DEPT. OF CONSERVATION & DEVELOPMENT
Box 2719, Raleigh, North Carolina

I accept Governor Hodges' offer of a free copy of the RESEARCH TRIANGLE booklet.
