By IRENE JORDAN

A YARDFUL—A whole yard wide, as proved by the yardstick, this giant fungus growth is measured by Jim Keal in Independence, Mo. The growth came from a small stump in Keal's garden. It's composed of separate tubes which branch into 100 or more "leaves." Muddy yellow in color, the fungus is hardening into a woody effect.

Santa Claus North Pole
Dear Santa: Please bring me a stuffed animal and skirt and coat for Christmas. And a new shirt for Dad.

I've been a good girl—though sometimes not so clean.
Love,

P. S. A washer and dryer for Mommy.

This might be typical of the letters to Santa and while doing your shopping, keep an eye on the washing labels.
Toy animals are now made with foam rubber stuffing that washes as easily as your favorite foam pillows. The coverings of several on the market are completely washable. Here is how:

1. Wash in automatic washer on low, heat setting. Use a mild soap or detergent.
2. Set the temperature of dryer on low and fluff dry.
3. Brush to bring up nap, if necessary.

Children's clothes now bear the label "washable". This saves on the number needed to fit the rapidly growing bodies and on cleaning bills.

The labels of some manufacturers state: Wash in automatic washer with mild soap or detergent. Dry in dryer. Remove before bone dry! This prevents setting wrinkles and allow the article to be worn with little or no pressing.

Corduroy, a favorite of Dad and the small fry, takes to the washer and dryer with equal ease. Corduroy can be dried to the nearly damp stage and removed for wear without ironing.

Many of the disciplined materials today are labeled with exact instructions for washing and drying automatically. Follow these instructions and Mom can have a Christmas present of extra time 265 days of the year while her family wears and plays with Santa's well chosen gifts.

Elements that contribute to successful washings, as stated in the January and February, 1956, issues of Good Housekeeping:

1. Proper temperature of water
2. Soap or detergent suited to machine and articles laundered
3. Bleach when necessary
4. Properly sorted load

commissioners will be given thorough consideration before specific projects are presented by Director Babcock for Commission consideration.

Next Cancer Clinic Friday, January 3rd

The Northeastern Cancer Clinic will be held on Friday afternoon, January 3, 1958, with registration beginning at 12:30 o'clock. A free chest X-ray will be given to anyone wishing it, along with the examination of the five areas of the body where cancer is most easily found and cured. There are no limitations as to sex, race, physical or economic status at the center. However, women should be 35 or more; men should be 40 or over unless referred by a doctor, or unless one of the "Seven Danger Signals" or "Symptoms" are present.

Only 30 people can be seen at the Center each month due to limited facilities, so it is suggested that anyone who wishes to be assured of an appointment should write the Cancer Center, Elizabeth City, N. C., for a priority. Examinees are asked to bring a robe or housecoat with them.

The Bank of Edenton will be closed all day Wednesday and Thursday of next week, December 25 and 26, in order to observe the Christmas holidays. Important banking business should, therefore, be transacted accordingly. The bank will be open as usual Friday morning, December 27.

TRY A HERALD CLASSIFIED

The North Carolina State Highway Commission last week approved a \$6,000 allocation of Federal-Aid Secondary Funds for the 1958-1959 fiscal year for the paving of rural secondary roads and the improvement of sub-standard bridges on such secondary roads.

Upon request of Highway Director W. F. Babcock, the Commission put its stamp of approval on an expenditure of approximately \$5,000,000 for paving secondary roads on a priority basis with the additional \$1,000,000 for the improvement of sub-standard bridges.

Federal-Aid funds are made available to North Carolina on a 50-50 matching basis, with one-half the funds allocated from the State Highway Fund.

Babcock told the Commission he has requested each Division Engineer to indicate which of the top ten priority roads in each county qualify for use of Federal-Aid secondary paving funds.

Roads will be paved in each county according to the priority rating of each rural secondary road, with those qualifying for Federal-Aid Secondary Funds and at the same time, rating high on a priority list in each county to be given first consideration.

The allocation by the Commission sets in motion the programming of paving projects and bridge work. However, recommendations of county boards of

MITE AND MANE—Dwarfed by a lion-like "big brother" this toy poodle musters just as much of a fierce attitude as its protector in London. The giant French poodle, named Tzigane Angah, and tiny but tough Tzigane Dee, are awaiting the beginning of a kennel club show in the British capital.

The next day she was worried

by a continual ringing of the bell. At last, when no one answered the door, she opened it herself and found her servant on the step. "Whatever are you doing, Li?" she asked. "Yesterday you foolee me, now I foolee you," was the reply.
