

National Merit Scholarship Test Now Administered To Juniors

Of interest to every college-bound high school student in America is the qualification test of the National Merit Scholarship Program. Dr. John Stalnaker, director, has announced in Evanston, Illinois, several new values of the 1958-1957 Merit Scholarship Program.

The National Merit Scholarship Corporation administers the nation's largest independently supported college scholarship program for high school students. In the 1957-1958 academic year it provided more than \$5,000,000 worth of four-year scholarships. The amount of the scholarship is determined by financial need, and they are renewable annually without further competitive examination. Dr. Stalnaker stated that this national program, which embraces all U. S. territories and possessions, sends thousands of deserving students to college—students whose unusual talents might otherwise be wasted due to their inability to finance the increasing cost of higher education.

The 1958-1959 testing program is designed to provide more service to participating students and schools. While it will still serve primarily as a preliminary screening instrument to select thousands of scholarship winners, the program has several new and important guidance and educational planning features. These additional benefits will be best realized by testing at the end of the junior year rather than at the start of the senior year. These new values are such that many students will want to take the test for purposes of educational or vocational plan-

ning, even though they do not expect to win a scholarship, Dr. Stalnaker stated.

All students will receive a report of their scores. These test results will enable students to understand their present academic strengths and weaknesses, will give them facts with which to plan their senior year, will help them decide about going to college, and will enable them to select college courses of study in which they are most likely to succeed.

All high school students in their second semester junior year or first semester senior year are eligible to take the test. Students can be enrolled in any public, private or parochial school in the 48 states. The charge for taking the test is \$1.00 per student, payable on the examination day—Tuesday, April 29, 1958. (In event of financial hardship, a limited number of students will be tested free. Students should consult their principals on this matter). Tests will take place from 9 to 12 in all participating high schools.

Science Research Associates of Chicago, an educational testing, consulting and textbook publisher, has been retained to construct, administer and score the scholarship qualifying examination. This company also conducts many other large-scale testing programs, including the Illinois State Scholarship Program, the Selective Service testing program and the Naval Reserve Officers testing program.

Any interested students are urged to register promptly at the principal's office before the March 20 deadline.
