

### Three P's PERSONAL AND PRIVATE PROBLEMS

This column was attempt to answer personal and private problems of individuals who submit their questions to this column. These inquiries to include family and social problems and will cover questions that come up in adjusting oneself to society; economic questions to include adjustment to business life and careers. All inquiries correspondence and names will be held in the strictest confidence. All inquiries and questions should be addressed to "Three P's", care of The Chowan Herald, Edenton, N. C.

Dear Three P's:

Recently I was talking with a friend of mine who keeps up with public happenings more than I do, that certain people are attempting to remove from libraries certain well known books that have been popular ever the years. Is this true and who gives them the authority to pass on what I should or should not read. It seems to me that it is narrow mindedness or perhaps a little bit of Russia has moved over here to tell us what we should and should not read.

JULIUS.

Dear Julius:

Yes, what your friend told you is true, alack and alas. There are two phases to the problem: First, people who are trying to tell us that certain books are poorly written, foolish, untrue to life and unwholesome. Included in such a list are all time favorite such as Uncle Wiggly, Horatio Alger books, Tom Swift, the Hardy Boys, Tarzan the Wizard of Oz and similar books. Dr. Dorothy Dodd, state librarian of Florida, has suggested that these books be removed from general circulation. Second, there are cer-

tain minorities that are trying to alter and change all books and literature, both modern and classic that may, in any of the characters, cast reflection on them in any way. In this latter group is included Shakespeare, Dickens, Mark Twain and other classic and modern books. Dr. Dodd is not the only one who has suggested the removal of old time favorites. Dr. Dodd and others are victims of modern education, who, because of false principles absorbed in their so-called education, try to artificially set the social modes for civilization. Such people do not realize that society is made up of all kinds of people, that there is ugliness in life as well as beauty, that there are heroes as well as blackguards. It would be a strange world if we did not read about all of it and were led to believe that all is truth and all is beauty; we would soon be an illiterate and ambitious people. Of course, you should be suspect of all Ph.D.'s. They live such a narrow life in obtaining their degrees they are unaware what is going on outside in the real world. Many a university library is filled with junk, the thesis of Ph.D.'s. The Ford Foundation is concerned about this in its last report. This is what said report states as the problem: "In our zeal to train scientists, technicians and professional people we are producing 'too many minds in a groove'—they are inadequately prepared for the momentous issues facing society as a whole." No one should have a Ph.D. degree until past their forties when perhaps they will have developed a more mature view of life. It is strange to note that the percentage of neurotic and psychiatric cases among

**HADDIX HAS IT**—First man ever to pitch 12 consecutive innings of perfect major league ball is Pittsburgh's Harvey Haddix, center, shown during his unique performance against the Milwaukee Braves, at Milwaukee. At left is a close-up of his fast ball grip; at right, his knuckle ball is shown. Haddix retired 36 Milwaukee batters in order, topping by three the number of consecutive batters retired by Sam Kimber of Brooklyn, in 1884. Despite this performance, he was charged with loss of the game because of an unearned run by Milwaukee in the 13th inning.

Ph.D.'s is rather high. Then there are certain ethnic, racial and religious groups who are not really minorities, except in numbers, for they are loud and well organized in their voice of protest. They are trying to remove from public schools all reference to Christmas and Easter and in fact all reference to any religious subject. Then there is an attempt to remove numerous characters from Shakespeare, Dickens and other writers, as though there was any group in the world that did not have its despicable characters. If they were removed it would not make the surviving people any better morally or otherwise better. There is not a people represented in any literature that does not have its heroes and cowards. This propaganda is false and harmful in the end. The authority for banning books rests generally with the library authorities and you should protest to them. The other is the result of well organized propaganda. You, too, can protest if you feel that way.

Dear Three P's:

My husband is in the mail order business and as a result he receives a great deal of mail especially from women. For several months past he has been receiving the mail from the women at home and I notice that some of the mail contains pictures. Of course, he does not show them to me nor does he discuss them with me. It gives me some concern. What shall I do?

DESPERATE.

Dear Desperate:

No doubt you are sure that the mail your husband receives at home is from women. Of course, there always can be the assumption that it is strictly business and not worry about it. However, you apparently are somewhat suspicious and your curiosity is aroused. There is little you can do about it except discuss it with him in the open. Why do you not collect the mail and hand it to him and ask him what it is all about. I would keep it in the open for it would be simple for your husband to have a mail box and have the mail delivered there without your knowledge. It is best to keep it in the open and not let him know that it disturbs you. It is worth a try.

There is no genius in life like the genius of energy and industry.  
—Donald Grand Mitchell.

### AROUND THE FARMS IN CHOWAN COUNTY

By C. W. OVERMAN, Chowan County Agent

The cooperative wool marketing pool will be held at Sermonds warehouse, Hackney Avenue, in Washington, D. C., on Monday and Tuesday, June 22 and 23. The wool pool has been sold to Nichols & Company of Boston, Mass.

Prices per 100 pounds are as follows: Clear wool, \$51.56; coarse wool, \$46.06; short and heavy wool, \$46.00; light burry wool, \$47.00; medium burry wool, \$44.00; heavy burry wool,

\$40.00; stained wool, \$42.00; re-jects, \$36.00 and tags \$10.00.

Growers who want us to arrange for cooperative hauling from Edenton to Washington must notify the county Extension office, phone 3127. Chowan Storage Company has agreed to serve as a collecting point. Lloyd Bunch will not have labor or time to tag your bags or handle your wool. Go to his office and he will tell you where

to put it. Each bag must be securely tagged with the grower's name, address and number of bags. For cooperative hauling, wool must be delivered to Chowan Storage Company warehouse on or before Saturday, June 20.

A second cooperative lamb marketing pool is scheduled to be held at the Farmers' Livestock Market at Plymouth on Wednesday, June 24. Growers who plan to take lambs to this pool must notify the County Agent on or before June 19.

Black rot on bunch grapes can be controlled by spraying. The spray schedule starts while the vines are dormant. We will be glad to send a spray schedule to anyone who contacts us.

Japanese beetle has already begun to work on grapes. Dust with 10% DDT or spray with 50W DDT. If you spray, also use Fermate and it will help control the black rot. Spray with Fermate, one ounce to three gallons of soapy water, every 10 to 15 days until grapes be-

gin to ripen. Fermate is not poisonous.

During the last three weeks before ripening do not use DDT. It is poison. Use Malathion up to five days before ripening.

The Japanese beetle is here. Spraying with 50W DDT or dusting with 10% DDT will control the beetle. It loves grape vines, roses, apples, peaches and many other plants. Watch closely for it and control it before severe damage occurs.

Boy, what a wonderful rain! It is a good time to make another planting of vegetables in the garden. Keep the garden insects under control. Rottenone is a good insecticide to use on vegetables ready for harvest. Four percent Malathion dust is good but don't use within a week of harvest.

Replant those missing places in the peanut field if there are many. You will make peanuts and keep down the grass at the same time.
