New Homes For Owners Of Farms

Provisions of the Farm Housing Program were explained this week by Donald W. Norman, Farmers Home Administration County Supervisor for Perquimans and Chowan Counties.

He said the main purpose of farm housing loans is to provide farm dwellings and farm buildings that are essential to the farming operation. During the past this type of loan has been made for constructing new homes, dairy barns, lounging barns, hog parlors and other farm buildings.

To be eligible the applicant's farm must be of such size and productive capacity that it will produce crops and livestock in sufficient quantities to consist of a substantial portion of the operator's total cash income. Mr. Norman said that loans made in the past had been made on a minimum of 25 to 30 acres of land.

Interest on these lands is charged at the rate of 4% per year on the unpaid principal balance. As the borrower reduces the principal balance the amount of interest he pays each year reduces accordingly.

These loans may be repaid over a maximum period of 33 years. However, each borrower can select the number of years that he wants to repay the loan in accordance with his income. The yearly payment on a \$10,000 loan for 33 years would be \$551, including principal and interest. Mr. Norman stated that under good farming conditions some of the present borrowers were paying more than a payment each year.

Each farm housing loan is secured by a first or second mortgage on the farm being improved. Farm owners can obtain additional information about the

loan program at the FHA office located on the second floor of the bus station building at Hertford.
