Town Councilmen Again Considering Assessment Policy

Consumption Of Peanuts Now At An All-Time High

Faced with a number of time-consuming problems, Town Councilmen at their June meeting Tuesday night, were held in session until shortly after the midnight hour.

One of the major problems facing the Councilmen was again consideration of adopting an assessment plan for construction of sanitary sewerage and portable water systems. Some time ago an assessment program was adopted but was junked when so much opposition developed and legal entanglements were cited by local lawyers. So at present the town has no assessment plan and it is deemed necessary to have one by both Town Council and the Board of Public Works.

George Alma Byrum, chairman of the Finance Committee, presented for consideration the plan as adopted in 1955 and later rescinded which reads as follows: "That the Town of Edenton adopt a policy for assessment of cost of providing, constructing and establishing extensions of sanitary sewerage system and portable water system in said town and that the actual cost of the establishment and construction of such extensions shall be assessed upon the lots and parcels of land in said town abutting directly on the lateral mains for said extensions, according to the extent of the respective frontage thereon, by an equal rate per foot of such frontage, and that the assessment to be levied in connection with such work may be paid in equal installments covering a period not exceeding the limitation provided by law, and that such resolutions shall designate by general description the improvement to be made, and the street or streets, or part or parts thereof, whereon the work is to be effected, and the cost thereof to be assessed upon all abutting property."

After a lengthy discussion it was decided to delay action in order for the Councilmen to
