AROUND THE FARMS IN CHOWAN COUNTY

By C. W. OVERMAN, Chowan County Agent

Begin Cotton Insect Control: You have heard the old adage, "An Ounce of Prevention Is Worth A Pound of Cure." This is true in cotton insect control. A new concept of cotton insect control has proven very successful and efficient in preventing insect damage and loss.

The new plan has two phases. The first phase begins as soon as the cotton plants attain eight leaves. That is right now. Beginning immediately, make four insecticide applications at five-day intervals. Then stop. This should kill the weevils coming out of hibernation before they lay any eggs. One female weevil can lay about 250 eggs, at least half of which produces females. Each of the young females can do the same. Therefore, when you kill one hibernated female early you have prevented possibly 15,000 or more female weevils for the season.

The second insecticide phase begins about July 25, when the first brood begins field migration. Make at least four more applications at five-day intervals. This should continue until squaring is complete. Between the two periods, examine the field each week and treat if the punctured square count reaches five percent.

Use 15 pounds of dust per acre per application of either of the following insecticides. I suggest that you vary insecticides to take care of insect resistance. Insecticide combinations recommende dare Aldrin 2½% and DDT 7%, Dieldrin 2% and DDT 7%, Guthion 2½% and DDT 7%, Heptachlor 2½% and DDT 7%, Malathion 10% and DDT 7%, methyl Parathion 2½%, and DDT 7% and Toxaphene 14% and DDT 7%. Individual insecticides recommended are Endrin 2% and also Sevin 10%. These materials may also be obtained as spray concentrates for mixing with water. Follow the manufacturer's recommended rates.

For red spiders and other mites, use Ethion 4% or Trithion 2%. Apply 25 pounds of dust per acre.

Extension Circular No. 429-61, "Cotton Insect Control," is available at your County Agent's office. Call for a copy if needed. If cotton is worth growing it is worth protecting against insects. Let's make the most of what we have in this cotton crop.

Peanuts: Nematode injury is showing up in many peanut fields. The application of one gallon of actual nemagon per acre has made 600 or more pounds of peanuts when applied early to growing peanuts. It will not injure the plants and you will notice a difference in plant growth in about two weeks.

Local dealers carry nemagon under the trade name of Fumazone 44E or Fumazone 70E. Follow the manufacturer's recommended rate of application. Apply the fumigant in the soil six inches from the plants on each side and four to five inches deep in the soil.

Thrips, a very tiny yellow insect working in the buds, are causing crinkled leaves. Dust or spray plants with Aldrin, DDT or some other recommended insecticide. To prevent this trouble, Aldrin, Heptachlor or some other soil insecticide should have been applied just ahead of the first cultivation.

Plan to control leafspot disease this year, it pays well. Make three or four applications of copper-sulphur dust at two-week intervals beginning in early July. Start with 15 lbs. per acre and gradually increase the rate up to 20 lbs. per acre as the plants grow. Spray materials are also available this year. Remember—apply every 12 to 14 days.

Chemical Weed Control On Peanuts: Chemical weed and grass control on peanuts is working successfully this year. Jarvis Skinner of Advance cultivated the fourth week. Clarence Lupton of Advance had excellent result on one eight-acre field but grass came in another treated field.

Edward Hare of Enterprise sprayed a half acre demonstration on May 25. On Monday, June 19, there was still excellent weed and grass control. The plants on the uncultivated, treated plot look better than the adjoining cultivated area.

Marcel Ward of Ryland treated an area on May 23. He had excellent weed and grass control for three weeks but an occasional sprig of grass was beginning to come, so he cultivated the June 14.

R. V. Copeland of Gliden used an eleven-inch band treatment after planting. Unable to hold the spray bands accurately over the planter track, some grass came near the peanuts. However, he was able to delay cultivation for three weeks. Band treatment should be made with same tractor when planting so that bands will be properly placed.

20 YEARS AGO

Continued from Page 1—Section 1

service registration was planned in Chowan County to increase and train personnel for the armed forces.

A swimming pool for Edenton was the principal topic discussed at a meeting of the Edenton Lions Club.

Miss Margaret Spires was notified that she had been awarded a scholarship in the School of Medicine at Duke University.

Williamston and Tarboro, members of the Coastal Plain League, transferred a game to Edenton as a goodwill builder.

Mrs. C. S. Vann, who had been very ill at her home, was reported as gradually improving.

Raleigh Hollowell was awarded a trip for he and his wife to Wrightsville Beach by the Durham Life Insurance Company for exceeding his quota in writing new business.

With a war scare becoming more acute, Postmaster C. E. Kramer was appointed Chowan County Chief in conducting air raid alarms.

At a meeting of the Edenton Rotary Club a suggestion which struck a responsive chord was to sponsor a project to plant more crepe myrtle trees in Edenton.

Miss Rebecca Idol Hollowell of Edenton and Vason Hamrick, Jr., of Shelby and Charlotte, were united in marriage in Greensboro.

Following the Edenton Rotary Club assuming sole sponsorship of the Edenton Boy Scout troop, a new troop committee was appointed including C. E. Kramer, Geddes Potter and Hector Lupton. J. Edwin Bufflap, president of the Rotary Club, urged the group to meet immediately to reorganize.

Ralph Parrish, president of the Edenton Merchants Association, represented the local organization at the State Merchants Association Convention held at High Point.

Jaycee Team Leads In Little League

Heated Race Develops For First Place In Standing

Tht second week's play of the Little League marked a heated race for first place. The most improved team in the league is the Jaycees. During the first week of play they were unable to win a single game but during the past week they won five in a row. Some of these wins were by one-sided scores.

The most exciting game of the week was a Jaycee win over the Corvairs by a score of 3-2. All the runs in this game were scored in the thrill packed fifth inning with no other scoring in the game. Brian Twiddy got on base with an error. Robert Smith followed with a walk. The next batter struck out. Then the hero of the game, Herky Billings, hit a home-run, scoring three runs. The Corvairs came back with two runs in the bottom of the fifth, but the rally fell short. A large measure of the Jaycees success can be traced to the consistent hitting of Bill Mitchener, Mike Overton, Buddy White and Tony Twiddy.

History Of Campbell College On Television

A professionally made, half-hour TV documentary on most of the state's TV stations, at 8 P. M., June 22 will tell the story of Campbell College—its past, present and future. Some of the shots were made during the final days of this past term.

Campbell College is a private school for qualified students who seek a higher Christian education. Since 1925, Campbell College has been under the control of the Baptist State Convention.

Ocean Hiway Maps And Guides Available

Continued from Page 1—Section 1

will not encounter delays at the terminals.

An unusually interesting feature that passengers will find this summer on the enjoyable miniature ocean voyage will be the opportunity to view phases of construction of the great $200,000,000 Chesapeake Bay bridge and tunnel project now underway. Man-made islands are now visible, massive pilings are being driven and huge sections of tunnel are being sunk for this 17½-mile long bridge and tunnel, which by the end of 1963 will replace the Chesapeake Bay Ferry operation.

Passengers will find on the several ships interesting paintings, engineers drawings, maps and other description material portraying how the bridge-tunnel construction project will look when completed. Also, while enjoying the relaxing break from driving, they can have refreshments at the ship's snack bars or enjoy a full meal in the dining rooms.

From headquarters at Wilmington, Del., of the non-profit 27-year-old Ocean Hiway Association announcement also is made by Mrs. Reba M. Brothers, association secretary, that additional supplies of the popular 1961 Ocean Hiway map folder and of the Ocean Hiway Motorists Guide have been received from the printers. These are available free, along with copies of the new summer ferry schedule, and will be sent by return mail to all who write. Requests should be directed to Ocean Hiway Association, P. O. Box 1552, Wilmington, Delaware, or to Little Creek Ferry, P. O. Box 120, Norfolk, Va.

The Ocean Hiway route, 988 miles along the scenic and historic coast from New York City to Jacksonville, Fla., is U. S. 13 in its northern sector and U. S. 17 from just south of Norfolk all the way to Florida. It is advertised as the fastest and safest route from pines to palms and is especially popular in summer months because it is much cooler than interior routes and because it serves so many popular beach resorts of the Atlantic coast.

Usefulness is doing rightly by yourself and others.
—Mary Baker Eddy.

Greensboro Concern Changes Its Name

Joe E. Conger, Jr., vice president of the Edenton Chamber of Commerce has received word that Romeo Guest of Greensboro, president of United Constructors, Inc., has changed the firm's name to Romeo Guest Associates. A North Carolina Corporation, its principal office remains in Greensboro. Romeo Guest Associates contemplates expansion of operation in North Carolina and into the Southeast and the Midwest, Conger stated.

"Romeo Guest has always been favorably inclined toward Edenton," Conger said, "and in the past has worked closely with members of our Chamber of Commerce Industrial Development Committee to bring new payrolls to Edenton. We are pleased to learn of his plan to expand operations."

Industrial construction projects will be handled through management contracts, it was learned. The personnel is experienced in a wide range of industries such as chemicals, electro-chemicals, pulp and paper, alloy steel, machinery, textiles and electronics.

According to Conger. Romeo Guest stated in commenting on future plans, "while we will be handling construction contracts for leading industries in a wide geographical area, we expect to continue our concentrated efforts to create through industrial promotion our goal of a thousand new industrial jobs in North Carolina annually."

Romeo Guest Associates is headed by Romeo H. Guest. John A. Dwiggins is vice president in charge of production. Both have been associated in the construction business in the Southeast for many years.

Property Of Legion Post Clear Of Debt

Continued from Page 1—Section 1

White, adjutant; John Lee Spruill, assistant adjutant; William A. Perry, finance officer; Troy Toppin, service officer; Steve Long, sergeant-at-arms.

Another highlight of the meeting came when the outgoing finance officer, Roy Leary, presented to the new commander the deed for the Legion property as being paid in full.

Refreshments were served by the Auxiliary following the meeting.

New Meat Discovery Available At P & Q

P & Q Super Market announced this week that they have been selected as distributor for a new process Western U. S. Choice Beef, known as Pro Ten process.

Swift & Company has developed through research a method for injecting papain, an enzyme from the fruit of the papaya tree, into live cattle. This tenderizer circulates in the blood stream, remains dormant until the meat is brought to cooking temperature.

This is essentially the same as applying meat tenderizer to a tough steak, but since it is factory controlled and is distributed over the entire carcass of the beef by way of its blood stream, the customer is always assured of even tenderness, even in the normally tough cuts.

Swift is now marketing this product through seven of its 49 packing plants. P & Q Super Market is proud to be appointed distributor for this improved product in Eastern North Carolina.

BLOODSHED BOXSCORE ON N. C. HIGHWAYS

Raleigh — The Motor Vehicles Department's summary of traffic deaths through 10 A. M., Monday, June 19 follows:
