

## AROUND THE FARMS IN CHOWAN COUNTY

By C. W. OVERMAN, Chowan County Agent

**Copper-Sulfur Dust To Peanuts:** The first application of copper-sulfur dust to control the leafspot disease on peanuts should be applied this week.

Fifteen (15) pounds of dust per acre is sufficient for the first two applications. Duster nozzles should be set just above the peanut plants so that the dust is put into the plants with as little driftage as possible. An application should be made every ten days to two weeks, depending upon the weather.

**Don't Apply Diazinon Yet:** We must remember that the activity of diazinon lasts for approximately sixty days. Therefore, if diazinon is applied too early its effectiveness can die out before the peanut crop is made and there may still be worm trouble in peanuts. As soon as we feel the proper time for applying diazinon is here, we will notify all growers by mail as well as through this column.

**Cotton Insect Control:** Many cotton growers started dusting for boll weevil at the 8-leaf stage of growth. If cotton was dusted every five days as recommended, the fourth and last dusting of this first schedule should be complete.

The next dusting schedule should begin about July 23, making four more applications at five day intervals.

**400 Bushel Sweet Potato Club:** The 300 Bushel Sweet Potato Club has been raised to 400 bushels. A large number of growers have qualified in the 300 bushel class and several in the 400 bushel class. The committee has raised the base to 400 bushels, setting the star a little higher to be shot at.

Side-dressings of 8-0-24 side-dresser should be made until at least 500 pounds of side-dressing per acre has been applied. We have had some heavy rains which, no doubt, will leach out much of the nitrogen. If sweet potato fields begin to show a slight yellow cast, an applica-

tion of 100 pounds of nitrate of soda should be broadcast per acre when the leaves are dry. There will be no need to cultivate the nitrate of soda in as the next rain will take it into the soil.

### Edenton and County Suffer From Rainfall

Continued from Page 1, Section 1  
Weather does not kill the roots, according to Overman. Low spots where the rain collected and stood were hurt the worse. Extent of damages will depend on the type of weather the state and county receive during the next few weeks, reported Overman. He said that he hoped the damage in Chowan County would not exceed a quarter of a million dollars.

J. H. Conger, Sr., weatherman for the county, reported early this week that 10.96 inches of rain fell during June and this total fell on 17 different days.

In Edenton, a heavy thunderstorm that preceded the north-easter last Tuesday forced several streets to be blocked for a time and police to erect detours around pools of water. Be-leaguered Providence Baptist Church was struck by lightning which caused a fire, but the blaze was quickly brought under control by Edenton firemen.

Overall, it was one of the biggest rainfalls to ever hit Edenton and the county in such a short time, and damages far exceeded some of the hurricanes.

### JEHOVAH'S WITNESSES TO MEET IN GREENSBORO

The Edenton Congregation of Jehovah's Witnesses has been invited to attend a gathering of about 6,000 expected to be present at the huge Memorial Coliseum in Greensboro. The meeting will be held July 13-15 and is one of 59 similar assemblies being held throughout the United States and Canada this summer.
