A LIFT FOR TODAY

If any man would come after me, let him deny himself and take up his cross daily, and follow me.-Luke 9:23.

Acceptance of the Cross of Christ means crucifixion of our lower selves, and willingness to follow the ground-plan of Christian living.

Teach us, O Lord, the difference between forced crosses and chosen ones, that we may willingly dedicate ourselves to Him who freely gave His all for us.

Rules On Water Needed

It is encouraging to note that the North Carolina State Wildlife Resources Commission has awarded a contract for construction of a boating access area at the Chowan River bridge. The addition of this facility will, without doubt, attract many more boating and fishing enthusiasts to waters hereabout. And while the advantages of water recreation will be greatly increased, it goes without saying that the possibility of accidents on the water will also be greater.

In this connection what Dick Herbert, who writes "The Sports Observer" in the Raleigh News and Observer, has to say is very timely. In Tuesday morning's edition of the News and Observer Mr. Herbert had this to say:

"Almost every day there is an item in the paper about a needless drowning. It is startling in this day of easy communication that so many are so ignorant about the dangers of water.

"The Florida tragedy in which one adult Sunday school supervisor and 17 children were drowned brings all this to the front again.

"How anyone could put 18 youngsters in addition to himself into a small 14-foot boat is beyond comprehension. Not more than five should have been in the boat and all of them should have been equipped with life

"Overloading a boat has taken many lives. Almost always the overload is with people who can not swim. They pile into the craft as long as it will stay afloat. There is no thought to the fact that once it ships water, it is almost certain to put all the occupants into the water.

normal capacity before the weight of 19 occupants put it under when one or two of them made a movement in position.

"There are a lot of campaigns for water safety, but there still is no requirement for getting into a boat and running it. A fiveyear-old could drive a craft with a 75-horsepower motor sending it at speeds of 35 miles an hour, and the other people on the lake or river would be at his mercy.

"The man who put 18 youngsters in a boat that was built for not more than five paid for the error with his life. But the 17 to 1 was a bad rate of exchange

"Progress has been made in educating boat operators about how to operate their crafts safely. There still is much to be done.

"It is amazing how a man cautious in every other respect will buy a powerful boat and then try to run it at top speed in dangerous waters without knowing anything about how it should be done properly.

"The water is a wonderful place to relax and have fun, but it also is a place where the rules of survival must be observed. There is a great responsibility placed on anyone who owns a boat. He should remember it."

Edenton's Town Council has become very much concerned lately about safety in local waters and at present is investigating the possibility of the Wildlife Resources Commission having the authority to adopt rules and regulations relative to water travel.

There are strict rules which must be complied with by motorists who travel on the highways and with travel on water increasing by leaps and bounds, some provision should be made for certain requirements on the part of those who travel on water.

There are many people who think anything is evil if many people like it.

The expression of personality is not synonomous with oddity or insanity.

If it wasn't for the detailed work, every business man would be a wizard.

Obey the rules of the road if you would the to live longer.

Heard & Seen By Buff

Edenton and Jimbo's Jumbos in particular got a plug in the August 17 issue of Life Magazine. In a preliminary paragraph commenting on industry's spectaculars appeared the following: "In Edenton, N. C., you can Iimbo's Jumbos (peanuts) being salted and bagged for the ball park trade." The article further states: "At a lot of places which invite inspection the host practices the pleasant custom of sending visitors away with free samples-from a chocolate kiss in the candy plant to a foaming beer in the brewery's private bar.'

Mr. and Mrs. Jimmy Oglesby were very gracious hosts at their cottage along the Chowan River the other afternoon when the Missus and I paid them a visit. Jimmy went to a lot if trouble to go on a little fishing trip out in the river in front of his cottage. And, like I do when taking friends or relatives fishing, the bloomin' fish just didn't bite. I did catch something, however, for Jimmy showed me around his place, so that I "caught" two very friendly red bugs. Mrs. Oglesby, too, showed off her pet Chihuahua dog which is about as big as two cents. She knitted a coat for the dog and dressed him all up for the company. Anyway, the folks who have cottages (and they're quite a few of 'em) along the river apparently enjoy the time they
