Stop Stalling...

fire up with the new gasolines that stop carburetor icing

PURE Firebird GASOLINES

If you've ever stalled in traffic, you know how annoying it can be. What's more, stalls waste gasoline and are a safety hazard. Many motorists blame stalling on plugs, points, or ignition system. Fact is, carburetor icing is usually the villain.

Carburetor icing can occur even when the temperature is as high as 55°. When gasoline vaporizes in the carburetor, it has a refrigerating effect. Ice forms, blocks the air flow, your engine stalls.

The two powerful new PURE Firebird Gasolines contain a special additive that coats the carburetor throttle plate and walls. This coating prevents ice from building up to block the air flow and stall your car. This same additive cleans out dirt and other carburetor deposits. You enjoy a smoother running, more powerful engine, and better gasoline mileage.

Enjoy a car that starts faster, runs better, farther, with greater economy. Come in today... fire up with new PURE Firebird Super with Tet-tans or new Firebird Regular. No extra cost.
