

Peanut And Cotton Vote December 11
Continued from Page 1, Section 1

want to market their crop. Marketing quotas have been in effect continuously for the last nine crops. In the last vote, 98.2 percent of the farmers voting expressed approval of using the quotas for the 1962 cotton crop. At least two-thirds of the farmers voting must favor quotas before they may continue in effect.

The prospective total for 1962-63 exceeds the normal supply by about 5 million bales, and quotas had to be proclaimed for the 1963-crop of cotton.

Marketing quotas operate through acreage allotments. A grower who exceeds the cotton acreage allotment for his farm, under a cotton marketing quota program, will be subject to a marketing quota penalty of 50 percent of parity on the farm's excess production. Growers who do not exceed their cotton allotments may market free of penalty all the 1963 cotton production from their farms. With a marketing quota program, price support to eligible growers will be at a level between 65 and 90 percent of parity. Without a quota program, support will drop to 50 percent of parity.

Polling places for both referendums will be open from 8 A. M. to 6 P. M., as follows:

A Community — ASCS Office and Grover Cale's Store.
B Community — Earl Smith's

Store and M&R Service Center.
C Community — H. R. Peele's Store and L. C. Briggs' Store.

BIG NEWS
