Edenton Given Another Grant Of \$68,000 For New Municipal Building

Half of \$136,000 Estimated to Build New Municipal Building And Fire Station

Officials of Edenton were again agreeably surprised Friday when they were informed by Congressman Herbert Bonner's office that the Community Facilities Administration had approved a \$68,000 grant to Edenton. The grant was approved under the accelerated public works program, which has already given substantial assistance in the construction of a sewage disposal system for Edenton.

The \$68,000 grant is half of an estimated expenditure of \$136,000 for the construction of a new Municipal Building and renovating the entire present Municipal Building into a fire station.

Final plans and specifications for the improvements have been prepared and are now ready to be advertised for bids just as soon as the government gives the green light.

The new Municipal Building will be erected on the site now used by the Police Department. The present station will, of course, be torn down to make room for the new building. The proposed new Municipal Building will house the Police Department, a chamber for Town Council meetings, offices for officials and will be modern in every respect. It is likely that the town will rent the first floor of the Red Men building on Broad Street while the present building is renovated and until the new structure is finished.
