

The NATIONAL OUTLOOK

BY GEORGE HAGEDORN

Learn Now — Pay Later
Increasing interest is being shown in plans for financing college educations by loans to students. After all, almost every other kind of major purchase can be made on the installment plan. In the past, if a family could not pay college tuition from savings or current income, the student had one of three choices: a scholarship, if eligible; working his way through; and borrowing. Although borrowing will not be appropriate or desirable in all cases, with the increased demand for college education it must be considered. This situation leads some people to argue that the federal government should make more funds available for loans on easy terms. The government is already in the field under the provisions of the National Defense Education Act. When this law was being considered in 1958, some educators argued for outright gifts to college students, claiming it would be unfair to "mortgage" a youngster's future by having him go into debt for his higher education. Congress evidently found no merit in this claim and provided only a loan program. The good records of repayment on college loans from non-federal sources may have contributed to the decision that this form of debt is not too onerous. This speaks well for the good faith of students who have borrowed in order to go to college because, after all, an education cannot be re-possessed. Emphasis on the federal program may arise partly from the fact that alternative sources of educational-loan funds are not widely known. There are a number of state schemes for underwriting student loans, and commercial bank credit is available for families who are willing to pay tuition if they can budget the cost on a monthly basis. There is also a "college reserve program." This last, administered by United Student Aid Funds, Inc., allows colleges to deposit their loan funds as an 8 percent reserve for loans made to their students by commercial banks. Thus \$4,000 deposited becomes the reserve for \$50,000 of loans, to be repaid by the students after they have completed their education. The ingenuity with which localities and private enterprise have approached the problem makes it evident that there are alternatives to federally-subsidized loans. Any college education is already subsidized because, traditionally, tuition amounts to about half the actual cost. The student who really wants the education should be willing to repay his half.

BLOODSHED BOXSCORE ON N.C. HIGHWAYS

Raleigh — The Motor Vehicle Department's summary of traffic deaths through 10 A. M., Tuesday, November 12, follows:
Killed To Date 1125
Killed To Date Last Year 1132

Chowan Included In Highway Bids

The State Highway Commission on Friday announced a call for bids on projects for the December 3rd highway letting. Twenty-one projects in twenty-two North Carolina counties are included, involving more than 53 miles of road construction. Three Interstate Route projects are also included.

Among the projects is one calling for 1.45 miles of grading and drainage for improvement to U. S. 17 and NC 32 in and near Edenton.

Edenton Policemen Receive Certificates

Continued from Page 1, Section 1
The officers for completing the course and the splendid record they made.

Those receiving the certificate were W. F. Miller, Charles H. Williams, Melvin W. Griffin, John D. Parrish, William S. Clements, Jr., H. J. Lupton and Ernest W. Connor. Chief Griffin had previously received a certificate. Sheriff Glenn R. Matthews of Perquimans County also completed the course and will be sent his certificate.

The Councilmen devoted some time to the idea of funneling traffic at Broad and Church Streets at the Triangle Restaurant and Broad and Queen Streets. Prepared maps were presented to better explain the plan which is designed to better regulate traffic and reduce traffic hazards. No definite action was taken pending referral to the State Highway Commission.

The Councilmen also devoted considerable time to regulations on the proposed free parking lot back of the stores on the east side of Broad Street. This plan calls for entrance and exits and will allow two-way traffic on Court Street from Queen Street to Water Street, with no parking allowed on Court Street. The County Commissioners have agreed for the town to police and regulate the parking lot.

The Councilmen considered placing a blinker light at the corner of Queen and Moseley Streets, scene of a number of accidents, the latest occurring last week when two trucks collided.

Town Attorney William S. Privott was authorized to instruct the United States Lumber Company to replace a railroad switch which was recently removed on the base property.

Some consideration was again given to the widening of West Queen Street by the State Highway Commission. Some objection has been registered against this project due to the necessity to interfere with some crepe myrtle trees.

A site for the fire station was again aired, with five proposed sites presented by a committee instructed to investigate sites. No action was taken due to the general feeling that no money should be spent for a new site, and the lack of being fully convinced that the station should be moved from its present quarters.

Another matter to claim the attention of the Councilmen is parking of gas and oil trucks in the residential area at night. This practice was pointed out as very dangerous, so that action was taken which will require such type vehicles to be parked at the bulk plant areas.

Town Clerk W. B. Gardner reported that a 90% inspection has been made of the new sewage disposal plant and that plans now are for having it in operation in December.

SKI WRITER—Bob Pleus, a tricky Cypress Gardens, Fla., water skier, nonchalantly writes a note while he skims across the surface of the water at the same time.

The Councilmen were informed that a special meeting would be held Wednesday night to open bids on the new Municipal Building.

The Councilmen also discussed the probability of collecting garbage every other day instead of every day. Though considerable interest in the idea prevailed, no action was taken pending further study.

On the agenda was an item

relating to rest rooms on the new parking lot. This suggestion was deemed inadvisable so that the matter was dropped.

VFW MEETS TUESDAY
William H. Coffield Post No. 9280, Veterans of Foreign Wars, will meet Tuesday night, November 19, at 8 o'clock. Commander Noah Goodwin, Jr., requests a large attendance.

TRY A HERALD CLASSIFIED

Helicopter Will Be In Edenton Friday
