One application of Premerge saves you at least two early cultivations. (Maybe more!)

No weeds—no early cultivation needed. And if you spare young peanut plants early cultivation, you spare them the damage caused by covering the foliage with soil, root-pruning and soil compaction. Result: stronger, healthier root systems and top growth that get your peanuts off to a flying start for maximum yields. Harvesting is simpler, too, without weeds. Just one application of PREMERGE® weed killer at cracking time

is all you need. Weeds never know what hit 'em. Note the new recommendation on the label! And now that PREMERGE costs even less, there's even more reason for you to use it. We've told you why, let your nearby Dow Farm Chemicals supplier tell you how. See him soon. The Dow Chemical Company, Agricultural & Industrial Bioproducts Sales, Midland, Michigan.
