

Home Economics Extension News

By Mrs. Annie S. Charlton, Home Economics Extension Agent

Community 4-H club leaders have begun training boys and girls in their respective communities in making articles out of broom corn. These include the 4-Hers who are carrying "Crafts" as a 4-H Club project.

Mrs. Rosa Overton directed the workshop at Warren Grove on Friday, where eight 4-H Club members learned how to make hearth brooms. Mrs. Fannie Parks and O. A. White were in charge of the workshop at Hudson Grove Tuesday. Five 4-H Club boys and girls were trained.

We are sure that you have taken advantage of the favorable weather we have had recently and have your home vegetable gardens well underway. Remember emphasis is on a large number of different vegetables—enough for daily use and to conserve for later use. Community home vegetable garden tours will be held in June. Garden leaders will assist in selecting all vegetables and small fruits that provide vitamin C to members and non-members going on these tours.

A way to use hard cooked Easter eggs.

They were fun to color—and to hide and find—and beautiful to look at in Easter baskets or as a centerpiece on the dining table. Now what?

You may find that you have a lot of perfectly good boiled

eggs left, along with a sudden lack of interest in eating them. Food specialists of the U. S. Department of Agriculture suggest a way to use four to six of them in a delicious, high-protein main dish that will revive lagging appetites:

Egg, Cheese, Potato Scallop
 1 cup thin white sauce
 1 tablespoon minced parsley
 2 or 3 medium-size cooked potatoes, sliced
 1 cup shredded cheese
 4 to 6 hard-cooked eggs, sliced
 Salt and pepper
 Soft breadcrumbs
 Combine white sauce and parsley. Place alternate layers of potatoes, cheese, and eggs in a greased baking dish, sprinkling each layer lightly with salt and pepper. Add white sauce. Top with breadcrumbs.
 Bake at 357 deg. F. (moderate oven) 15 to 20 minutes.

Small Plants
 If you intend to buy a few potted petunias—or other flowers—for transplanting in your garden, select the plants carefully. Choose small rather than large ones, urges the U. S. Department of Agriculture.

The larger, sometimes already flowering plants may look sturdier—but don't let them tempt you. They won't be able to stand the shock of transplanting as well as smaller plants.

Plant the petunias as soon as you get them home. Use a knife blade to carefully lift the seedlings from the planting container. Handle them as little as possible. And try not to pinch them.

Petunias, snapdragons, and many other annuals—such as celosia, salvia, and ageratum—bloom from late spring until they are killed by frost.
