

JUST ARRIVED!

ALL NEW! GIANT SCREEN 21" PORTABLE TV

21" overall diag. meas., 21 1/2 sq. in. rectangular picture area

ZENITH
DELUXE QUALITY
HANDCRAFTED TV
Built Better to Last Longer

Note the imaginative new "Flush-Front" design for a totally different look in portable TV styling

FULL ZENITH PERFORMANCE FEATURES

- Zenith Patented Custom "Parma-Set" VHF Fine Tuning Control
- Peak Picture Control
- 20,000 Volts Picture Power
- Power Transformer
- Automatic "Fringe-Lock" Circuit

The AUSTIN • N2180 The Award Series

All new compact big screen 21" portable TV styling! Metal cabinet in Metallic Tan color. Top carry handle. Deluxe Video Range Tuning System. Dipole Antenna. Outstanding Zenith

HANDCRAFTED!

FOR GREATER DEPENDABILITY!

Every Zenith TV chassis connection is 100% handwired. The rugged metal chassis base with up to 200 times greater heat conductivity than phenolic used in printed circuit boards means fewer service problems and greater operating dependability.

**NO PRINTED CIRCUITS!
NO PRODUCTION SHORTCUTS!**

Objective

The two WAVES were being followed by a lone sailor. Finally, one of the gals

could stand the suspense no longer and, turning to the sailor, ordered: "Either quit following us or get another sailor."

Students To View GM Science Show

THE SUNMOBILE—WATCH IT GO! The amazing Sunmobile, a car that runs on sunshine, is shown in action in this time exposure. The button-like photovoltaic cells on the hood turn light energy into electrical energy to move the model car. A 800-watt lamp simulates the sun. The Sunmobile is one of the demonstrations in the General Motors science show Previews of Progress. The 40-minute admission-free stage show dramatizes the wonders of science before two million American students and adults each year.

"Liquid sunshine" powers a portable radio. A small platform slides across the floor on a thin layer of air. And a "misbehaving" suitcase illustrates principles used in modern guidance systems.

John A. Holmes High School and D. F. Walker High School students will see these and other interesting demonstrations when the famed General Motors science show, Previews of Progress, appears at the schools on Thursday, March 31 at 10 A. M. and 1:30 P. M. respectively.

"We seek through Previews to inspire more young

people to make science and engineering their career and provide the trained talent America must have to keep pace with the promise of the future," James M. Roche, president of General Motors, declares.

Steve Winchell of General Motors Public Relations staff will narrate the 45-minute, non-commercial presentation. They are one of seven teams that take the show to more than a million students each year.

One of the highlights of the show is a fuel cell, a device that converts chemical energy into electrical power. Potentially one of the most significant scientific developments of the century, the fuel cell manufactures electricity with much greater efficiency than is now obtained from conventional power plants.

In the show a few drops of "liquid sunshine" added to the cells provide enough energy to operate a portable radio.

Another example of solar energy, the amazing Sunmobile, will be demonstrated. The 15-inch model car depends on eight photoelectric cells for its operation. The button-like cells on the hood of the car convert light rays into electricity which drives a small electrical motor inside the car. A 300-watt lamp is used to simulate the sun's rays in the show. As the light strikes the cells, the Sunmobile moves smoothly across a table.

In addition to sun power, the Previews audience will see an air bearing platform in operation. This small platform, supported by three large circular pads, is designed to slide over any flat surface on a thin layer of air.

The operation of the Previews platform is simple. A small blower forces air through the three pads, creating a thin layer of air between the pads and the floor. The air eliminates nearly all sliding friction, enabling easy mobility of the platform.

Another Previews sequence illustrates principles used in modern guidance systems. A student volunteer will manipulate a suitcase with "a mind of its own" as the lecturer explains how today's planes, ships and missiles are safely guided along predetermined courses.

Students will also see the Exploding Wire Phenomenon. Using the principle of stored energy, a 10-watt power supply furnishes over 30 million watts in an instant to demonstrate the electrical disintegration of a fine wire. This phenomenon may some day propel space vehicles.

Other Previews demonstrations include examples of the wonders of modern chemistry and a capsule history of jet propulsion traced from 200 B. C. to futuristic gas turbine power.

Previews of Progress has already been seen by more than 34 million American students and adults. The demonstrations, constantly updated to keep pace with recent technological advances and presented in easy-to-understand non-technical language, have proved to be a big hit with students around the globe. Nearly eight million persons in Latin America, Europe, Africa, Australia and New Zealand have seen the show.

At the request of the U. S. Department of Commerce GM equipped and trained special units of the show for appearances at five International Trade Fairs in South America and the Near East.

County News

By MRS. EGAN EVANS

Sympathy goes out to the Chappell family and the Elliott family of Hertford, Route 2.

Mrs. Lillie Saunders is reported as being feeble.

Edenton Baptist Church revival is in progress this week. Dr. M. Ray McKay is bringing the messages.

The Associational WMU meeting of Chowan Baptist Association was held Tuesday at Cool Springs Baptist Church.

The choir festival scheduled to be held at Wake Forest has been changed to a later date.

Revival is being held this week at Immanuel Baptist Church. Speaker is Rev. Bob Ware and guest speaker is Dr. Stuart Mirriam.

The Senior Play, at Chowan High School will be presented Friday night, April 1. The title of the play is "Popcorn".

The Albemarle Craftsman's Fair is to be held in Elizabeth City April 20-21 in the National Guard Armory.

The Little Theater will present "The Devil and Daniel Webster" at Edenton May 6-7.

The FHA of Chowan High

School entertained their mothers and fathers last Wednesday night.

Gliden Community Development Organization held a covered dish supper Monday, March 28 at Ward's Community Building at 7:30 o'clock. Roger Spivey showed a movie "Dead Out".

The Northeastern Cancer Clinic will be held Friday afternoon, April 1, at the Health Department in Elizabeth City. Registration begins at 12:30.

Mr. and Mrs. Carey Evans and Mr. and Mrs. Roland Evans visited Mr. and Mrs. Alvin Evans and Mrs. Effie Evans Wednesday night of last week.

Roland Evans, Mrs. Beulah Williams of Suffolk and Mrs. Effie Evans called on Mrs. Lillie Saunders, Doris Jean and Ralph Saturday afternoon.

The Bill Fouts family was in Williamston Sunday. The Graham Farless family was in Williamston on Sunday.

Sarah Coward spent the weekend with her brother and family.

Mr. and Mrs. Fletcher Perry of Suffolk visited Mr. and Mrs. Evans and mother on Sunday.

MR. PEOPLES SAYS:

MANY THINGS GO RIGHT when a wife is thrifty. We know a wife who puts hubby's every paycheck into a checking account. Then she transfers everything over \$500 into a savings account. She saves over \$1,000 each year. A neat trick and YOU can do it.
