

washington report

by Rep. Walter B. Jones

During the past week the Nation's Capitol has been invaded—not by a foreign enemy, but by thousands of friendly and smiling high school students. Incidentally, if any school in the First District is planning visiting Washington, please advise us in order that we can offer the assistance of this office in connection with your visit.

Outer Space: On Tuesday, May 3, the House passed by record vote of 349 yeas to 10 nays, a bill providing for

\$4,968,864,150 for the National Aeronautics and Space Administration. It appears that the United States is determined to "keep pace in the race with space."

Thursday, the appropriation bill for the Department of Health, Education and Welfare was passed by the House. One of the most controversial sections of this bill was the appropriation of \$416,200,000 to be allocated to the public schools in the Federally impacted areas.

The President has recommended that this figure be reduced to \$183,400,000, but many of us felt that this reduction was not justified for such a tried and proven program.

In the First North Carolina Congressional District there are 10 school administrative units which receive these supplemental funds. We were able to override the Administration and restore the funds for the impacted areas.

Many of us are differing with the Administration in their recommendation that we cut the appropriation for many successfully proven programs, based on many years of experience, while increasing by tremendous amounts, the appropriations

for many of the new and unproven programs. For example, the \$1.7 billion which is requested for the "Poverty Program". So far, we have been able to restore the necessary funds for such items as School Lunch Program, Milk Program, Agriculture Extension Service, and other programs.

The Higher Education Facilities Act of 1963 was extended for an additional three years. When we consider the tremendously increased enrollment on the college level, this type legislation, if administered fairly, can be of inestimable value.

Ten years ago there were some 240,000 students in graduate education in the United States; today there are nearly 600,000 and in 1974 it is estimated that there will be over one million graduate students in our colleges and universities.

CANDIDATE FOR THE

House of Representatives

I would like very much to have your support and vote and allowed the privilege of Representing you in the 1967 N. C. General Assembly.

This is my first offering for an elective political office, however, my Father served as both a Representative and State Senator. My younger Brother was Mayor of Elizabeth City for four terms, resigning to accept a Postmaster appointment. My reason for mentioning this is to inform you that — although I have had little experience in the elective field — I have certainly been exposed to its environment.

About the only thing that I can say for myself is that I am a small business man with no axes to grind and whose outside positions in the past were involved only in community service. These, however, have afforded me reasons to believe that — if elected — I can serve the Counties of our District in a fair and impartial manner.

Each registered voter has the opportunity of selecting two of the announced field of six to serve as their Representatives in the 1967 General Assembly. Should you be allowed to cast one of your votes in behalf of my candidacy, you can be sure that it would be much appreciated.

Sincerely yours,

W. T. "Bill" Culpepper, Jr.
