A reception was given by the bride's parents in the church fellowship hall following the wedding. Arrangements of palms and glads were used in the reception hall. Lighted candles, fern and small flowers were used on the table. Wedding cake, punch, nuts and mints were served.

How to add years
to your life

100

100 years ago the average American could expect to live about 40 years.

Today—about 70. Modern sanitation, diet, drugs and medical practice have added 30 years to our life span. And note that 70 is average. Many die sooner. Many live longer. You up your chances of being a "longer" if you eat properly and get proper medical care. This means periodic check-ups by your physician. As pharmacists we are pleased to help by supplying the drugs your doctor prescribes—drugs unknown a century ago. We're so conscious of the effectiveness of modern medicine that we're shooting for a life span of 100 years.

How about you?
