Know Your Social Security

Signing up early is a real advantage when applying for disability, retirement or medicare benefits. Anyone applying for disability benefits must have been disabled for six months before benefits can be paid. The six-month period can be used in getting evidence of age, earnings and medical records so that benefits can be paid promptly at the end of the six months.

Signing up early for medicare is even more important, since medicare protection beginning with the month you are 65 requires that you enroll in the three months before your 65th birthday. "Many people delay signing up for medicare because they think they have to stop work to get medicare, but this is not true. You can have medicare protection

even if you are still working, but you should apply in the three months before your 65th birthday so it will be effective the month you become 65. Don't delay, apply today if you are within three months of age 65, or if you can't work because of disability.

Auto Theft Frequency
NEW YORK—The chances of your car being stolen rose from 1 in 203 in 1948 to 1 in 157 in 1965, according to the Insurance Information Institute. There were 486,568 cars stolen last year, many of them by thieves who found the cars unlocked and keys in the ignition switch.

There are no experts like the men who have no responsibilities. They apparently know all the answers.
