*A Thought to Remember*

**By MARVIN BARHAM**

They say there is a sun dial in Covington, England, which bears this inscription, "I mark time, dost thou?" It is a constant reminder to the people that time is important, and is passing away.

We often hear the expression: "There just aren't enough hours in the day." This statement is made by the happiest of people. They are using time—and could find the use for more.

I believe it was Einstein who said: "Time is relevant." Relative to how it is being used. Fast and rapid on some occasions, while slow and dragging in other situations. Young lovers witness the fleeting moments to time. A prisoner awaiting release spends hours that seem eternal.

The person who lives the long, rich life says in his 80's: "Life has been so short." It was full, rich and enjoyable. All people can be that way simply by marking time like the sun dial. Using the moments to their fullest.
