

Around The Farms

By C. W. OVERMAN

Soybean Growers' Meeting: A county-wide soybean production and marketing information meeting will be held at the Center Hill Community Building next Wednesday night, March 19, at 7:30 o'clock. All soybean growers, supply dealers and others are invited to attend.

For further information, see another article in this newspaper.

Swine And Egg Referenda: On March 26 two referenda important to swine producers and commercial egg producers will be held. Polling places will be at the same places and at the same time.

Swine producers will vote on the continuation of the assessment of five cents per head on hogs sold for slaughter. Commercial egg producers will vote on the continuation of the assessment of two cents per case of market eggs sold.

The money collected from these programs will be sent to the N. C. Commissioner of Agriculture who will turn it over to the N. C. Pork Producers Association and the N. C. Egg Marketing Association respectively.

The two associations will History is little more than the register of the crimes, follies and misfortunes of mankind.

—Edward Gibbon.

CARD OF THANKS

I hereby wish to express my sincere thanks and deepest gratitude to the many friends who so kindly remembered me at the death of my mother, Mary Minnie Bazemore. I deeply appreciate the lovely cards, the prayers, the flowers and every expression of sympathy. Your thoughtfulness and understanding will long be in my memory and I thank you with all my heart.

MARY ANN POTTS AND FAMILY.

use the money for promotional, educational and research programs approved by the respective boards of directors.

For further information, refer to other articles in this newspaper.

Scale Insect Control: This is the time of the year that scale insects begin to emerge and spread. Last Saturday I found some patches on peach twigs.

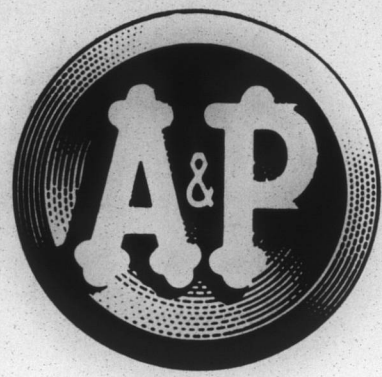

These emerging scales appear as light colored cottony or fuzzy masses on the stems or twigs. At this stage they may migrate to other parts of the plants. At this stage they are relatively easy to kill.

Thorough spraying, to wet the stems, with one tablespoonful of either of the following to one gallon of water—Malathion 57 per cent EC or Lindane 20 per cent EC or Nicotine sulfate 40 per cent EC or Thiodan 25 per cent EC. EC means an emulsified liquid.

Repeat the application at 10 day intervals until the problem is licked. It may take two or three applications. This control measure is good on ornamentals, shrubs and trees.

Backyard Gardener TV Programs: Many people have questions to arise about lawn and garden problems. Each Monday evening beginning at 8 o'clock over Channel 2, Columbia, University Station, N. C. Agricultural Extension Specialists John H. Harris, Howard R. Garis and R. L. Robertson will be answering questions and giving information on growing, insect and disease control in the garden and about the lawn. These programs will be on each Monday evening beginning March 17 and run through May 26. If you have any questions you want to send in, you may do so by calling 755-2177 or writing to Backyard Gardener, Box 5546, Raleigh, N. C. 27607.
