Could you
guess what's
good about a
headache?

If you happen to have one right now, probably all you need is an aspirin. But the fact is: a headache sometimes is a signal. It may be telling you something is wrong... perhaps something quite remote from the pain. In this event it's a *symptom*—valuable information for your physician. So if you have a persistent or recurring headache and don't know why, see your doctor. Don't take a chance. Your physician can probably clear up your problem in short order. Of course, he may say all you need is aspirin—but even that's worth knowing.
