PROGRESS IN HOUSING—On June 6 proceedings were launched by the Building Inspection Department of Edenton to condemn the structure at 204 East Albemarle Street, shown at left. Shortly thereafter, Sam Collins purchased the property. The renovated dwelling is shown at right. Inspector Sam Long said the house has a modern bath and hot water. It has already been rented. "This is a good example of what can be done to some of the delapidated structures in Edenton," Long noted.

Clean Reactors

To maintain high purity in the waters used in nuclear power reactors, nickel alloys are specified for all water-contacting equipment. Each of the two steam generators being constructed for a nuclear power plant in Virginia contains some 39 miles of high-nickel alloy tubing. Pure water circulating through the tubes is heated to a very high temperature in the reactor, and turns water flowing outside the tubes to steam to drive the
