SECTION B

Edenton, North Carolina, Thursday, November 20, 1969

SECTION B

## Around The Farms In Chowan County

The world's longest and highest gondola cable car span is located at Mahogany Rock on the Blue Ridge Parkway near Sparta. The skylift spans a distance of 4,073 feet.

Completely at her lover's mercy, beautiful Carroll Baker portrays a swinging jet-set widow in Commonwealth United's horror classic, "Paranoia," showing at the Taylor Theater Sunday, Monday and Tuesday.

If you never learn to Love is a great thing. stop kicking yourself in the If you don't think so, look pants for your daily mis-takes in life will come tions that approach you on harder and harder. the streets.

**Nickels For Know-How**

**Referendum**—This is one of the most important programs for the advancement of agriculture that we have ever had in North Carolina. Last week's column mentioned new soybean varieties (Dare and York), the development of NC-17, a new peanut that is expected to replace NC-2 and Jewel, a new sweet potato that will be available to commercial growers in 1970 or 1971. Blueboy wheat is a recently released, high yielding variety that is having a dramatic effect on wheat yields, not only in North Carolina but throughout the Eastern United States. Blueboy is the first variety of wheat to have given an official on farm yield of over 100 bushels per acre east of the Continental Divide. If one assumes only a 10 bushel per acre increase on the 196,000 acres of wheat which were harvested in 1969, and a price of \$1.25 per bushel, North

Carolina wheat growers can credit an additional \$2,450,000 of their 1969 income to Blueboy wheat.

Not all nickel research is directed to field crops or horticultural crops. Much research in broilers and swine has been made possible by the "nickels" program. Research at NCSU has shown that about 20 per cent of young pigs are infected by Strongyloidosis on about half of the farms producing hogs. The research also showed that the

primary route of infection is via the colostrum and milk of gilts and sows to their offspring. The Strongyloidosis parasite can cause death or at least stunted growth. Non-infected pigs, for example, are usually twice as big as infected pigs at eight weeks of age. A reduction in this parasite through improved sanitation and management can save North Carolina swine producers an estimated 3.5 million dollars annually.

Vote on November 25. Anyone that buys feed or fertilizer is eligible. There is a polling place near you.

**Fruit Trees for 1969-1970:** Dependable nurseries usually start digging and shipping fruit trees as soon as the leaves drop off in the fall. First orders are filled with choice material. According to T. W. Flowers, Extension horticultural specialist, one year old "whips" three to five feet tall is the most desirable

to buy. The plant should be pruned to 20 to 36 in-

**Why are some drugs like "ecstasy sauce?"**

If you read "Li'l Abner" you may recall how the Gourmet's Club plotted to make "Ecstasy Sauce" from the Yokums' pet pig, Salomey. Recipe: Boil down one hammus alabamus (Salomey) until just one single, solitary delicious drop remains—and that is "Ecstasy Sauce." In terms of food, this is humorously ridiculous, but it's actually routine in the making of drugs. Often hundreds of pounds of raw materials must be processed and reprocessed to obtain one tiny pinch of the active medication. Which helps explain why modern drugs are so potent, and why we pharmacists dispense them only when your physician writes a prescription.
