PREWAY KEROSENE SPACE HEATERS

UNVENTED
MODEL SUB-12A-3400

In this bail unit, Preway re-introduces a kerosene heater that was famous for performance twenty-five years ago — now refined and improved to make it better in every way. 11,000 BTU wick burner. Blue steel upper case, black finish base.

UNVENTED
MODEL SUR-24A-3404

Attractive appearance, high capacity and compactness are all combined in this heater to give you the most in total economy. Twin 11,000 BTU wick burners provide 22,000 BTU input per hour. Three quart fuel tank is integral part of each burner. Louvers are finished in ivory, cabinet in fawn.

PREWAY BLOWERS

for winter and summer service

Warm floors, wall-to-wall heat is always yours when your heater is blower equipped. The blower takes heat off the top of the combustion chamber and quietly propels it out into the room as a gentle, pleasant stream of tropical air. It's the most useful, recommended extra you can have. The blower is automatic, turns itself off and on as the heater warms or cools.

In summer, with manual switch operation, use the blower to keep sticky air moving within the room. It will make every one feel cooler. In fact, winter or summer, all you feel is comfort with a Preway blower.

All you feel is **COMFORT**

VENTED
MODEL DVM-75A-3408

High style, attractive appearance is only the beginning of this heater's appeal. 8" pot type burner generates 75,000 BTU input. Heats approximately 3 average size rooms. Front control knob for oil flow mounted on wood grain imprinted panel.

VENTED
MODEL SVM-50A-3406

Size alone does not reflect heat generating capacity — but good engineering does. So it is that you'll find here a compact, power-packed radiant circulator. 8" pot type burner develops 50,000 BTU's. Heats approximately 2 average size rooms.
