## Chicory Coffee Favored Night Cap

It's no secret that caffeine acts as a mild stimulant. But when nothing will do but a good cup of coffee after dinner, chicory coffee is the perfect late evening choice. All brands of chicory coffee contain less caffeine than regular coffee, with some of the most popular brands containing much, much less. Chicory itself is completely caffeine-free. Prepared from the root of a natural herb, it acts as an enhancer of flavor and aroma to make a great cup of coffee anytime of day.
