HOME REMEDY

Although they may not be packaged in handy aerosol cans, natural cleaning aids such as lemon, salt, vinegar and soda can often clean just as effectively as commercial cleaners. For clogged drains, try a handful of bicarbonate of soda and one-half cup vinegar. To clean stainless steel, polish with dry flour. With a coffee percolator, clean by brewing a solution of baking soda and water.

Top-of-the-Line '73 Monte Carlo

The all-new Monte Carlo, the flagship of the Chevrolet fleet, is among the most changed of all seven Chevrolet car lines in 1973. Featuring beautifully sculptured side and rear-quarter metal, new grille, and an optional Landau or opera-type vinyl roof, the Monte Carlo is a styling classic. Many months of advanced chassis and suspension engineering work have given the Monte Carlo handling and roadability said to equal or surpass that of Europe's most expensive personal touring cars. Introduction date for all 1973 Chevrolets will be Thursday, September 21.

Crossroads Of Aging

One of the in-home services needed to be provided in all counties, if these services are to be fully developed to assist the elderly to remain in their homes, is home health services. Home health service is given under physician's orders and delivered in the home. It includes nursing and at least one of the following: physical therapy, occupational therapy, home health aide, male orderly, and/or medical social worker. These services are provided either by a county or district health department, hospitals or an agency established for this purpose.

In North Carolina there are 34 home health agencies in 43 counties of the state, which are certified for Medicare and Medicaid reimbursements. It is estimated that 53 per cent of the state's population has some health services available.

Five counties of the 10 counties in the Albemarle have home health services available. Counties having home health services are Cam-

den, Chowan, Pasquotank, Perquimans and Tyrrell. The initiative for setting up a home health service must come from the community concerned. The initiative in creating interest for the service and for establishing the service may be taken by any of a number of local leaders or groups. Individuals or groups interested in creating such a service may contact the Program on Aging, Box 587, Edenton, N. C. 27932.

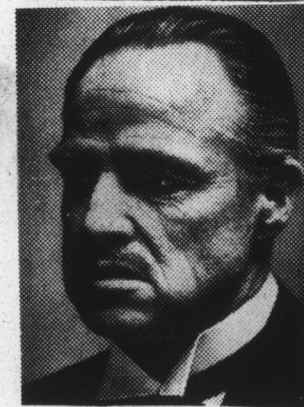

Once such a service is established the community must be informed to insure that all families, particularly all of the older people know about the service, how to avail

LITTLE GRAINS OF SAND

More than four million cubic yards of sand went into construction of the Chesapeake Bay Bridge-Tunnel. The sand was used principally to fill the hollow centers of the huge piles that support the trestled roadway, a major component in the prize-winning structure.

themselves of it, the requirements for its use and other pertinent information.

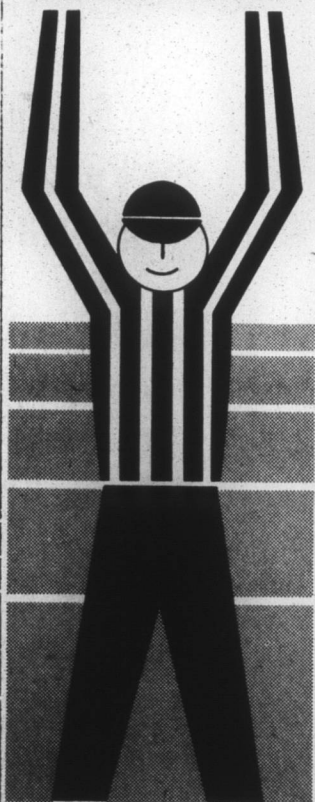

This is the second in a continuing series on in-home services. If adequate in-home services are available many elderly would never have to leave their homes to go into institutional living until they choose to do so.
