n better in the future.

## Heard & Seen "By Buff"

Mrs. Louis J. Fisher, the former Miss Ethel McMullan, now of High Point, sent the following letter last week:

"Dear Buff: Aunt Ethel said 'Write to Mr. Bufflap and tell him to renew my subscription to The Chowan Herald. 'Aunt Ethel' is Mrs. Frank Bond who you will remember left Edenton in 1934 to make her home with me in High Point. Up until six or seven years ago she visited in Edenton and Nags Head every summer, but after that the trip was a little too strenuous (she'll be 95 in December)—though she did get back for a short visit in the summer of 1971. She has kept up with the progress of Edenton through The Chowan Herald and doesn't want to miss a single copy, so I am enclosing a check for \$4.16 for renewal. My very best regards to you and Hector Lup-ton."

It was shortly before Mrs. Bond left Edenton that The Chowan Herald purchased its major piece of office equipment from her—a desk which even had drawers.

Getting fish hungry? Well, with the cooler weather upon us, the Methodist Men's Club will begin their pickled herring breakfasts. The first one of the season will be held Saturday morning at the church from 7 to 9 o'clock and the "cooks" say customers may eat as much as they can for a buck and two bits.

Last Sunday was celebrated as World-wide Communion Sunday, so that the churches throughout the world observed the Lord's Supper. In one instance, I've been told, it was decided to use real wine instead of grape juice. And in order not to conflict with other church activities, a few women went to the church about 9 o'clock Saturday morning to make the preparations, which doesn't take very long. However, at 11 o'clock the women were still there but were invited to leave. If they hadn't left, no doubt bread would have been the only ingredient left for the Communion service. Then, too, if the word gets around that real wine is being served, there'll probably be some of the "winos" taking Holy Communion.

In several sections of Edenton some old shacks have been and are being torn down, in the hope that eventually some low rent houses will take their place. But whether or not new houses will be built on the sites, the appearance is greatly improved with the old shacks gone. Who says Edenton is not progressing?

## CAMP REPORT

Continued from Page 1

fall recreational season. During storage, natural biological oxidation reduced the biodegradable organics by about 80 per cent.

Paessler said that at an August, 1970, hearing on the Chowan River Basin conducted by the State Water Control Board, the North Carolina office of Water and Air Resources recommended that Union Camp install additional waste treatment facilities and re-evaluate its discharge schedule. Following this hearing Union Camp undertook engineering studies aimed at improving the handling of the effluent from the plant.

"Our board has granted approval to Union Camp to implement the treatment program resulting from these studies incorporating our suggestions and those of North Carolina," he added. While storage provides for a significant reduction of polluting constituents in the waste waters, Union Camp studies were directed at enhancing this reduction.

Paessler explained that the board mechanically, he said.

approved additional facilities now being constructed at Franklin consist of a clarifier or settling basin, in the upper of the four ponds, and aerators in the second pond. The clarifier will allow more rapid removal of solids. The solid material will be deposited as landfill in ponds where it cannot get into the river.

Liquid effluent from the clarifier will flow into the second pond where 11 new aerators will speed up the micro-biological actions necessary to the breakdown and reduction of the organic pollutants which formerly reduced the dissolved oxygen of the river. From this point the system will operate as it has in the past with the effluent stored in the main holding pond.

However, as directed by the State Water Control Board, waste releases will take place only during the winter months of December, January, February and March and will be concluded prior to the spring herring run.

"Union Camp has provided us with a constant flow of data from their pollution control research and river studies. The close and constructive communications between that firm and the Board over a period of many years has added significantly to the available knowledge in the field," Paessler concluded.

## Gates Will Stay In Planning Area

GATESVILLE—For the second time in recent months, Gates County commissioners have voiced their approval to remain in the 10-county Albemarle Area planning Region R. Their latest action came Monday on a proposal to establish a new state planning region with five counties.

Earlier, efforts were made to get Gates to join with counties in Region Q. However, the commissioners decided it would be in the best interest of the county and its citizens to remain as part of the Albemarle Area.

The new region would have consisted of Bertie, Hertford, Northampton, Halifax and Gates. These counties are now in Regions L, Q, and R. In addition to Gates, commissioners in Halifax and Bertie counties indicated they do not wish to participate in the move.

The action left only Hertford and Northampton counties from among the five involved in the proposal with approved resolutions endorsing the move.

Chairman Lamar A. Benton of the Gates County commissioners, instructed Tezewell D. Eure, clerk of the board, to write a letter to Dr. Lee H. Hammond, deputy secretary, State Department of Administration, stating Gates County's decision.

Dr. Hammond had written the commissioners earlier asking for a decision prior to an October 9 meeting in Raleigh.

The letter from Gates explains "the county is recovering from a recent hassle on movement of regional boundaries" and "it seems best to remain in Region R."

## Board Meeting

Although the joint Landfill Project is in the final stages, an important question was brought up at the meeting of the Chowan County Commissioners Monday morning by Commissioner N. J. George. It concerned taxation of the project.

He stated that he did not consider it fair for the people of Edenton to pay for town collection, and yet be required to pay for services extended to the county outside of the town as well. Along this line, he said, he had seen no finalization by the planning committee.

Chairman C. A. Phillips, however, stated that the matter had been settled and some instances the funding may seem discriminatory, but why reopen the matter. The question presented by George was left hanging at that point without further comment.

Three fuel oil bids were presented to board from the B. P., Leary and Conger companies. The Leary company was the winning bidder with kerosene at a price of 14.65 cents per gallon, number two oil, 13.79 cents per gallon, and number three oil, 13.29 cents per gallon.

The county commissioners approved an expenditure of about \$215 to include Chowan County in a one-page advertisement in the centennial edition of the Daily Advance in Elizabeth City, as outlined by Ray Ward. The special edition is planned to include pages devoted to each county of the ten county Albemarle Area. The Chowan County page will include a brief history as well as landmarks, industries, and recreation. It will be designed to serve not only as a souvenir, but historical reference as well, reported Ward.

## Grant Approved

Dr. Edwin West, superintendent of the Edenton-Chowan Schools, reported at the board of education meeting Monday night on the acquisition of a \$29,000 grant from the federal government.

The program centers on the woman as wage-earner and homemaker, teaching the students the essentials of cooking, homemaking and sewing. Materials are presently being acquired from individuals and businesses in the area.

Due to a hold-up on the part of the federal government, the grant money has not been received. However, the program is currently being carried locally until the money arrives.

Assistant Supt. Cecil Fry also presented grant monies to establish a welding class in the school system. He stated it was an important occupational course in providing training for jobs in shipyards and other industries. He had earlier reported on the success of another such welding program, and has stressed the importance of trying to establish this sort of course.

In addition an across-the-board grant of \$6,251 for the Title I program was received. It will be centered primarily at Swain Elementary School.

October 22-28 has been designated as Education Week, stated Dr. West, and a full week of activities is being planned. Included in the events will be a bus tour of the school system by civic and government leaders, radio programs, concerts, occupational demonstrations, and athletic exhibitions.
