

ERNEST R. RANKINS

### Airman Rankins At Chanute AFB

SAN ANTONIO, Tex.—Airman Ernest R. Rankins, son of Mrs. Ruth I. Ward, 604 N. Oakum Street, Edenton, N.C., has been assigned to Chanute AFB, Ill., after completing Air Force basic training. During his six weeks at the Air Training Command's Lackland AFB, Tex., he studied the Air Force mission, organization and customs and received special instruction in human relations. The airman has been assigned to the Technical Training Center at Chanute for specialized training in the aircraft equipment maintenance field. Airman Rankins is a 1972 graduate of John A. Holmes High School.

### PLANT FERTILIZER

The 4-9-3 analysis fertilizer once commonly used on North Carolina tobacco plant beds has been removed from the grade list and has been replaced by 12-6-6 analysis. North Carolina State University extension tobacco specialists suggest using no more than 50 to 75 pounds of 12-6-6 per 100 square yards of plant bed.

### Dr. Hawley

Continued from Page 7  
Broad and vague generalizations will not be sufficient. The more detailed and abundant the evidence for wetland's importance the greater the chances of preservation and, wherever possible, quantitative evidence of significance should be included. The specific qualities which make a wetland important and worth protecting are left to your greater knowledge of the local situation. Statements phrased as if they were to be presented to the state legislature will carry the most weight. Eventually, that may be where they will be heard.
