SOMETIMES WE HAVE TO SAY "NO"
There are occasions when people ask us to re-fill certain prescriptions and we have to turn them down. This is not done without a good reason, however.

PRESCRIPTION REFILLS CAN BE LIMITED
When doctors order prescription medications for their patients, they usually include instructions to the pharmacist concerning refills. This is how they control the treatment period for each of their patients. Pharmacists must follow these refill instructions and may not exceed the number the doctor has ordered.

VARIOUS LAWS GOVERN REFILLS ALSO
In addition to the doctor setting a limitation of prescription refills, certain local and national laws place similar limitations on how long a prescription may be refilled. Under the law, some prescriptions cannot be refilled under any circumstances—even if the doctor requests it.

WHAT CAN BE DONE ABOUT ALL THIS?
Sometimes, depending on the patient's ailment, and the type of medication being used, it is necessary to make a new appointment with the doctor. Then he can decide whether or not he wants to continue the medication or change to another drug. Other times, it is possible to telephone the doctor to find out if he wants to follow the same line of treatment and renew the patient's prescription.

WE FOLLOW YOUR DOCTOR'S ORDERS
Whenever we are faced with an expired prescription, we will let you know. And, if it is feasible, perhaps we will be able to check directly with your doctor to find out what he wants to do about it.
