

April was proclaimed Cancer Control Month in North Carolina by Congress and a proclamation was presented by Phillip J. Kirk, Jr., Administrative Assistant to Governor James E. Holshouser and Area Vice Chairman for the American Cancer Society, to Moyer Smith, Crusade Chairman for the North Carolina Division.

Cotton Acreage Figures Are Due

Cotton
April 11 is the final date to release cotton acreage that will not be planted. Also, if you want more cotton to plant make your request by April 11.

Farm Records
ASCS personnel are verifying farm record information such as farm operator, owners, farmland and cropland when farmers visit the county office. Farm records need to be kept current so that allotments can be correctly established and any program payments properly made and reported.

Tobacco Discount
Tobacco will be supported at only 50 per cent of the support price if certain varieties are planted, these varieties are Coker 139, 140, 316, Reams 64, Dixie Bright 244, 187 Golden Wilt or any mixtures having similar chemical characteristics. There will be no price support on tobacco where it is found that certain chemicals have been used, such as DDT, TDE, Endrin or Toxaphene. Cured leaf will be taken at random on the warehouse floor for this check.

Soybean Program
A Federal loan support program for soybeans has been reinstated for 1976. The revived soybean program, abandoned for the 1975 crop, will allow soybean producers to store their crop and obtain government loans of \$2.50 per bushel.

Equipment Loan Program
Loans are still available for producers to purchase and install needed storage structures and drying equipment must be new. Loans are not available on used or secondhand equipment. Costs such as freight, sales tax, concrete blocks and erection costs are includable in determining net eligible cost. Concrete foundations and electrical wiring are ineligible cost items.

A down payment of at least 30 per cent of eligible cost must be paid to the vendor before disbursement by the ASCS Office. Loans are for a period of five years and are repayable in four equal installments. The current interest rate is 7.5 per cent on the unpaid balance. This rate can be

adjusted semi-annually by Commodity Credit Corporation if conditions warrant.

Interest Rates
On February 11, 1976 Commodity Credit Corporation resolved to maintain the present rate of interest which is 7.5 per cent annum, from April 1, 1976 through March 31, 1977.

For new loans disbursed on or after April 1, 1976 they shall bear interest at the rate of 7.5 per cent per annum from the date of disbursement through March 31, 1977.

The interest rate on outstanding loans bearing an adjustable interest rate will remain at the rate of 7.5 per cent per annum from April 1, 1976 through March 31, 1977.

Evans Selected For Inclusion In Fraternity

Twenty-four engineering seniors at N.C. State University have been elected to the Order of St. Patrick, national engineering leadership fraternity.

The outstanding engineering students have been honored for their exceptional scholastic and leadership records during their four years at NCSU.

The order of St. Patrick was named for the legendary saint who in chasing the snakes from Ireland "invented the first worm drive" and thus through his shrewd inventiveness became the patron saint of engineers all over the world.

Dean of Engineering Ralph E. Fadum will present each of the outstanding students certificates and honorary pins.

Among those elected was Robert O. Evans of Edenton, an agricultural engineering major.

The world's heaviest "coin" is the Fe or stone discs from the Yap Islands in the Pacific, which can be as large as 12 feet in diameter—and a medium-sized one used to be worth one wife or an 18-foot canoe.
