

INS Forewarns Of Alien Address Reports Problem

Aliens required to report their current United States address this January may find the procedure more difficult because of changes made by the U. S. Immigration and Naturalization Service.

The INS has eliminated several thousand postal facilities from its distribution list for Alien Address Report Cards and reduced the number of cards that will be sent to remaining post offices.

Only postal facilities in cities with a significant number of aliens reporting in 1980 will receive cards for 1981, the Postal Service said.

Postal facilities which do not receive the cards will not participate in the 1981 program. They will, however, assist customers by referring them to the nearest Immigration and Naturalization Service office to obtain registration cards.

Communion Set

The Lord's Supper will be observed at First Presbyterian Church at 11 A.M. Sunday. The pastor will preach on "In The Beginning", from Genesis, John and I John 1:1.

Trainee Jobs

Continued From Page 3 agency responsible for assisting landusers with planning and applying soil and water conservation measures.

Any interested college freshmen, sophomores or juniors must file applications no later than January 31, to be considered for employment in the summer of 1981. Applications may be obtained from the SCS Area Office, located at 203 East Queen Street, Edenton, as well as from the SCS State Office, located in Raleigh's Federal Building. The state office mailing address is Post Office Box 27307, Raleigh, N.C. 17611.

FACTS & FIGURES

To hold oil imports to 1978's 8.5 million barrels a day means holding domestic conventional oil and gas production at current or higher levels—which will cost about \$40 billion per year by 1990.

A cumulative investment of \$60 to \$70 billion is needed for synfuel plants capable of producing a million barrels a day by 1990, say experts at Gulf Oil Corporation. The need for capital is intensified by inflation: drilling rigs, offshore leases, etc., have gone up more rapidly than the Consumer Price Index.

Enhanced recovery techniques designed to squeeze more oil out of older fields have added about 385,000 barrels a day to U.S. oil production.
